International Standards on the Transport of Radioactive Materials; Public Meeting

AGENCY: Research and Special Programs Administration (RSPA), Department of Transportation.

ACTION: Notice of public meeting.

SUMMARY: This notice is to advise interested persons that RSPA will conduct a public meeting to discuss issues to be considered at the International Atomic Energy Agency (IAEA) Standing Advisory Group for the Safe Transport of Radioactive Materials

(SAGSTRAM) meeting to be held March 6-10, 1995 in Vienna, Austria. SAGSTRAM is a meeting of the Competent Authorities from Member States held annually to advise the Secretariat on major transportation issues facing the radioactive materials transportation industry and to plan the IAEA policies, activities, and responses to these issues.

DATES: February 28, 1995 at 10:00 a.m.

ADDRESSES: Room 4436, Nassif Building, 400 Seventh Street S.W., Washington, D.C. 20590.

FOR FURTHER INFORMATION CONTACT: Richard Boyle, Radioactive Materials Branch, Office of Hazardous Materials Technology, Research and Special Programs Administration, Department of Transportation, Washington, D.C. 20590; (202) 366-4545.

SUPPLEMENTARY INFORMATION: Several issues will be discussed at the public meeting which are being considered by SAGSTRAM at its March 6-10, 1995 meeting in Vienna, Austria. Currently, SAGSTRAM's agenda centers on resolving the issues that have arisen during IAEA's latest activities associated with the planned 1996 revision of the regulations governing the safe transport of radioactive materials (Safety Series No. 6).

The major issues on the SAGSTRAM's agenda are:

1. Review and approval of the regulatory changes proposed by the Third Technical Committee Meeting (TCM) for the Revision of the IAEA Regulations for the Safe Transport of Radioactive Materials (TCM-405-4).

2. Review and approval of the regulatory changes resulting from the recommendations

made by the International Commission on Radiological Protection (ICRP-60). The proposed changes were developed by TCM-800.3 and reviewed and formalized by TCM-405.4.

3. Review and approval of the proposed regulatory changes for packaging high activity radioactive materials and large quantities of radioactive materials transported by air. The proposed changes were developed by TCM-675.3 and reviewed and formalized by TCM-405.4. This agenda item will include a review of the possible exemption of very low dispersible material from the proposed air transport packaging regulations.

4. Review and approval of research topics brought before the IAEA transportation division for consideration. Proposed topics include: revision of the Q-system, use of non-ductile materials in radioactive materials packaging (brittle fracture), use of burnup credit for spent nuclear fuel packages, and the proper use and maintenance of UF₆ overpacks.

The public is invited to attend without prior notification.

Documents: Copies of all documents relating to the issues to be discussed by SAGSTRAM are on file in RSPA's Dockets unit (Nassif Building, Room 8421) and may be viewed Monday-Friday from 8:00 a.m. to 4:30 p.m. Documents may also be requested by contacting RSPA's Dockets Unit at (202) 366-4453.

Issued in Washington, D.C., on February 2, 1995.

Alan I. Roberts,

Associated Administrator for Hazardous Materials Safety.
