SUPPLEMENTARY INFORMATION:

Background

The final rule that is the subject of this correction amends 46 CFR parts 25 and 160 regarding structural and performance standards and procedures for approval of hybrid inflatable personal flotation devices (hybrid PFDs). Hybrid PFDs are designed to

have a minimum amount of inherent flotation to ensure that a wearer will surface after falling in the water and to have a mechanism to inflate the PFD to provide additional buoyancy, and thereby greater clearance from the water, while a wearer awaits rescue. The rule also allows for approval of hybrid PFDs for youths and small children.

Need for Correction

As published, the final rule contains typographical errors in table 160.077-2(j) and in citations contained in § 160.077-21. Also, the final rule contains formatting errors and an incorrectly designated paragraph in § 160.077-31.

Correction of Publication

The publication on January 9, 1995 of the final rule [CGD 78-174], which was the subject of FR Doc. 95-433, is corrected as follows:

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 64

[DA 95-36]

Bell Operating Companies' Joint Petition for Waiver of Computer II Rules

AGENCY: Federal Communications Commission.

ACTION: Memorandum Opinion and Order.

SUMMARY: On October 18, 1994, the United States Court of Appeals for the Ninth Circuit remanded in part the Commission's BOC Safeguards Order (57 FR 4373 (February 5, 1992)), which had established procedures for the Bell Operating Companies (BOCs) to offer enhanced services on a structurally integrated basis. This Memorandum Opinion and Order concluded that, because the Ninth Circuit decision generally returned the regulation of BOC enhanced services to a Comparably Efficient Interconnection (CEI) plan framework, waivers would only be necessary for new enhanced services or market trials, and for those existing services and market trials that were not covered by previously-approved CEI plans. In order to avoid possible service disruptions and customer confusion, the Common Carrier Bureau clarified the requirements for BOC provision of enhanced services, and granted the BOCs any necessary interim waivers to: Provide existing enhanced services pursuant to CEI plans approved prior to the lifting of structural separation; continue providing other existing enhanced services, pending FCC review of CEI plans for those services; file CEI plans for any new enhanced services; continue to perform research and planning activities and technical trials for enhanced services; continue existing market trials, conditioned on their filing the market trial notification required under the CEI plan regime; and begin market trials of new enhanced services pursuant to the market trial requirements of the CEI plan regime.

EFFECTIVE DATE: January 13, 1995.
