

hearings have been scheduled for February 16, 1995, in Weslaco, TX. The hearings are being held to explain the findings in an environmental assessment (EA) prepared for a proposed program to eradicate the boll weevil in the Lower Rio Grande Valley of Texas. The hearings are also intended to provide a forum for the public to present views and ask questions regarding the EA.

In response to requests received from the public, we have changed the site and time of the second hearing. The on-site pre-hearing registration and the hearing itself will be held at the Best Western Palm Air Motor Inn (see the **ADDRESSES** section of this notice). The time and place of the first hearing remain the same as announced in the January 30 notice (see the **DATES** section of this notice).

Persons who wish to speak at either hearing may register in advance by mail (see the **ADDRESSES** section of this notice), or in person at the hearing site. To register by mail, individuals should send a letter or postcard with their name and affiliation (e.g., farm worker, grower, or academician) and should specify which of the hearings they wish to attend, and the approximate length of time needed for their presentation and questions. On the day of the hearing, registration at the hearing site will begin at noon for the 1 p.m. hearing and at 6:30 p.m. for the 7:30 p.m. hearing. Attendees who do not register in advance will be allowed to speak after all scheduled speakers have been heard. We ask that anyone who reads a statement provide two copies to the presiding officer at the hearing. The presiding officer may limit the time for each presentation in order to allow everyone wishing to speak the opportunity to be heard.

The substance of this notice will be published in newspapers (English and Spanish) serving the Lower Rio Grande Valley of Texas.

Done in Washington, DC, this 3rd day of February 1995.

**Terry L. Medley,**

*Acting Administrator, Animal and Plant Health Inspection Service.*

## Forest Service

### Mount St. Helens National Volcanic Monument Boundary Modification

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to modify boundary.

**SUMMARY:** The Forest Service hereby gives notice of a proposed minor boundary modification for the Mount St. Helens National Volcanic Monument, Gifford Pinchot National Forest, Cowlitz County, Washington. The Act of August 26, 1982, establishing the Monument requires public notice of proposed boundary changes for a 60-day period prior to final approval by the Secretary of Agriculture.

**DATES:** The 60-day notice period expires April 10, 1995.

**FOR FURTHER INFORMATION CONTACT:**

Ralph Bauman, Lands Staff, Forest Service, USDA, P.O. Box 96090, Washington, DC 20090-6090, telephone: (202) 205-1248; or Bruce Watson, Assistant Lands Staff Officer, Gifford Pinchot National Forest, P.O. Box 8944, Vancouver, Washington 98668-8944, telephone: (206) 750-5103.

**SUPPLEMENTARY INFORMATION:** In accordance with section 1(b)(2) of the Act of August 26, 1982 (96 Stat. 301), establishing the Mount St. Helens National Volcanic Monument, the Secretary of Agriculture proposes a minor modification of the originally adopted boundary of the Monument. The modification will remove approximately 1.93 acres from the 111,500-acre Monument.

The current boundary of the Monument follows the east-west centerline of Section 35 to the south right-of-way line of State Route 504. The revision would delete a strip of land 100 feet wide containing Weyerhaeuser Company's access road to their lands north of the Monument.

The purpose of this boundary change is to recognize the newly created land ownership pattern in the area. During the negotiations with Weyerhaeuser Company for the acquisition of their property, it was agreed to exclude this 1.93 acre parcel. The acquisition of the Weyerhaeuser Company lands was completed in April of 1993, and a minor modification of the boundary is appropriate in this area.

The legal description of the boundary change is as follows: All descriptions are for the Willamette Meridian, Cowlitz County, Washington.

A strip of land 100 feet wide, 50 feet on each side of the following described centerline, as surveyed and filed in VOL. 12 PAGE 78, Cowlitz County, Washington. Beginning at the West ¼ corner of section 35, T. 10 N., R. 4 E., thence S 88° - 41' - 06" E, along the East-West centerline of section 35, a distance of 2483.41 feet to the intersection of the centerline of Weyerhaeuser road number 3500, and the true point of beginning; thence southerly with the centerline of Weyerhaeuser road number 3500, S 18° - 19' - 24" E a distance of 290.23

feet to the beginning of a curve concave to the West, having a radius of 247.03 feet, thence southerly 98.67 feet along said curve with a central angle of 22° - 53' - 04" to the end of said curve, thence S 4° - 33' - 40" W a distance of 114.01 feet to the beginning of a curve concave to the West, having a radius of 245.21 feet, thence southwesterly 206.80 feet along said curve with a central angle of 48° - 19' - 21" to the end of said curve, thence S 52° - 53' - 01" E a distance of 130.34 feet to the intersection with the Northerly right of way for State Highway number 504.

Maps showing this modification are available at the Office of the Forest Supervisor, Gifford Pinchot National Forest, 6926 E. Fourth Plain Blvd, Vancouver, Washington, and at the Office of the Monument Manager, Chelatchie, Washington. Notice has also been given to congressional committees as required by the Act. A notice of final action on this boundary revision will be published in the **Federal Register** following the 60-day period.

Dated: February 2, 1995.

**Sterling J. Wilcox,**

*Acting Associate Deputy Chief.*

### Thompson Creek Supplemental Plan of Operation Challis National Forest, Custer County, Idaho

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of intent to prepare supplemental environmental impact statement.

**SUMMARY:** The USDA, Forest Service, will prepare a supplement to the October 1980, Environmental Impact Statement (EIS) for the Cyprus Thompson Creek Mine (CTC). The Supplement will disclose the environmental effects of a proposal submitted by Thompson Creek Mining Company (TCMC) to prevent, control and treat acid rock drainage (ARD) at the Thompson Creek Mine. The potential for acid rock drainage was evaluated in the 1980 EIS, however, the predictive modeling program did not project that acid generation would be sufficient to cause ARD. The occurrence of ARD is a new circumstance, relevant to environmental concerns and bearing on the impacts of the project, therefore, the 1980 EIS will be supplemented to disclose the effects of these new circumstances. The proposal, as submitted by CTC, identifies modifications to the operating plan which would eliminate or control acid rock drainage. The modifications to the plan would: (1) Identify and isolate waste rock that has the potential for ARD, (2) limit infiltration and migration
