

number of individual placement models in 1994 and, for this grant cycle, discourages programs that place AmeriCorps Members individually across many organizations without providing opportunities for them to meet, share experiences and reflection, and learn from one another to better understand the collective impact they have on their community.

6. Localities for Concentration

A number of comments recommended that the Corporation retain the policy of providing special consideration for projects in areas that are environmentally distressed or adversely affected by Federal actions related to the management of Federal lands resulting in significant regional job losses and economic dislocation. Accordingly, the Corporation has adopted language to this end. "If empowerment zones and enterprise communities have been officially designated by HUD by February 28, 1995, the Corporation will give preference to applicants who propose to sponsor AmeriCorps service activities in those areas. The Corporation will also give preference to areas impacted by military downsizing." HUD has officially designated empowerment zones and enterprise communities. Programs proposing to operate in these areas will receive a preference.

7. Special Consideration for Past Corporation-Funded Programs

Several comments requested a change in Corporation policy regarding special consideration for past Corporation funded programs. The comments suggested that the Corporation allow the programs to apply as renewals and not new applicants, and that the Corporation waive the 15% local match. The Corporation has declined to make these changes. Accordingly, the policy reads as follows:

The following programs were funded previously, but are no longer eligible to apply directly to the Corporation. If these programs apply through the state process and if they are determined to be high quality, they will receive preference over other high quality programs during the Corporation selection process. Because their current funding is based upon 1994 priorities, they may apply under either 1994 or 1995 priorities, but are encouraged to address those for 1995. They must apply to the state using the application instructions for new programs.

- Defense Conversion Assistance Programs.
- Summer of Safety Continuation Programs.

- Subtitle D programs originally funded for two-year grants under the National and Community Service Act of 1990. These programs did not compete under the 1994 funding cycle.

- Subtitle H Programs of the National and Community Service Act of 1993 renewed from Subtitle E programs under the National and Community Service Act of 1990.

By way of further explanation, the requirement that Subtitle D programs funded with two-year grants apply as new applicants refers to those subtitle D programs that were funded by the former Commission on National and Community Service for the 1993 and 1994 funding cycles.

8. Other

A number of other comments concerned the following issues: Health Care Eligibility—Request to allow Members to include dependents on the AmeriCorps health plan at the cost of the Member. Child Care Eligibility—Request for a more inclusive policy that is not based on income levels, or prorating awards based on income. Education Awards Only Requirements—Request that the Corporation cover health care and child care costs for programs receiving Education Awards Only. These comments concern statutory provisions which cannot be changed by regulations. They can only be changed through amendments to the legislation. The Corporation is currently considering possible amendments to our legislation, and the above comments will be considered.

Authority: 42 U.S.C. 12501 et seq.

Dated: February 6, 1995.

Terry Russell,

General Counsel, Corporation for National Service.
