

the structurally significant details (SSD) defined in Lockheed Document Number LG92ER0060, "L-1011-385 Series Supplemental Inspection Document," revised January 1994.

(1) The initial inspection for each SSD must be performed within one repeat interval after the effective date of this AD, or prior to the threshold specified in the Lockheed Document for that SSD, whichever occurs later.

(2) A 10 percent deviation from the repetitive interval specified in the Lockheed Document for that SSD is acceptable to allow for planning and scheduling time.

(3) If the Lockheed Document specifies that inspection of any SSD be performed at every "C" check, those inspections must be performed at intervals not to exceed 5,000 hours time-in-service or 2,500 flight cycles, whichever occurs earlier.

(4) If the Lockheed Document specifies either the initial inspection or the repetitive inspection intervals for any SSD in terms of flight hours or flight cycles, the inspection shall be performed prior to the earlier of the terms (whichever occurs first on the airplane: either accumulated number of flight hours, or accumulated number of flight cycles).

(5) The non-destructive inspection techniques referenced in Appendix VI of the Lockheed Document (Revision A of Lockheed Drawing 1647194) provide acceptable methods for accomplishing the inspections required by this AD.

(b) If any cracking is found in any SSD, prior to further flight, repair in accordance with either paragraph (b)(1), (b)(2), or (b)(3) of this AD:

(1) In accordance with the applicable service bulletin referenced in Lockheed Document Number LG92ER0060, "L-1011-385 Series Supplemental Inspection Document," revised January 1994; or

(2) In accordance with the Structural Repair Manual; or

(3) In accordance with a method approved by the Manager, Atlanta Aircraft Certification Office (ACO), FAA, Small Airplane Directorate.

(c) Within 30 days after returning the airplane to service, subsequent to accomplishment of the inspection(s) specified in Lockheed Document Number LG92ER0060, "L-1011-385 Series Supplemental Inspection Document," revised January 1994, submit a report of the results (positive or negative) of the inspection(s) to Lockheed in accordance with Section V., Data Reporting System (DRS), of the Lockheed Document. Information collection requirements contained in this regulation have been approved by the Office of Management and Budget (OMB) under the provisions of the Paperwork Reduction Act of 1980 (44 U.S.C. 3501 *et seq.*) and have been assigned OMB Control Number 2120-0056.

(d) An alternative method of compliance or adjustment of the compliance time that provides an acceptable level of safety may be used if approved by the Manager, Atlanta ACO. Operators shall submit their requests through an appropriate FAA Principal Maintenance Inspector, who may add comments and then send it to the Manager, Atlanta ACO.

Note: Information concerning the existence of approved alternative methods of compliance with this AD, if any, may be obtained from the Atlanta ACO.

(e) Special flight permits may be issued in accordance with sections 21.197 and 21.199 of the Federal Aviation Regulations (14 CFR 21.197 and 21.199) to operate the airplane to a location where the requirements of this AD can be accomplished.

Issued in Renton, Washington, on February 7, 1995.

Darrell M. Pederson,

Acting Manager, Transport Airplane Directorate, Aircraft Certification Service.

Testing and Evaluation by Nationally Recognized Testing Laboratories and Use of Equivalent Testing and Evaluation Requirements

AGENCY: Mine Safety and Health Administration (MSHA), Labor.

ACTION: Notice to extend period for public comment.

SUMMARY: Due to requests from the public, the Mine Safety and Health Administration (MSHA) is extending the period for public comment regarding its proposed rule for testing and evaluation by nationally recognized testing laboratories and the use of equivalent testing and evaluation requirements.

DATES: Written comments must be received on or before February 21, 1995.

ADDRESSES: All comments should be sent to Mine Safety and Health Administration, Office of Standards, Regulations, and Variances, Room 631, 4015 Wilson Boulevard, Arlington, Virginia 22203.

SUPPLEMENTARY INFORMATION: On November 30, 1994, MSHA published a proposed rule (59 FR 61376) to establish new procedures and requirements for testing and evaluation of certain products MSHA approves for use in underground mines. The comment period was scheduled to end on February 13, 1995.

In response to requests from the public, MSHA is extending the time for commenting on this proposed rule to February 21, 1995. All interested members of the mining community are

encouraged to submit comments prior to that date.

Dated: February 8, 1995.

J. Davitt McAteer,

Assistant Secretary for Mine Safety and Health.

RIN 2115-AE47

Drawbridge Operation Regulations; Mullica River, NJ

AGENCY: Coast Guard, DOT.

ACTION: Notice of proposed rulemaking.

SUMMARY: At the request of Burlington County, New Jersey, the Coast Guard is considering a change to the regulations governing operation of the Lower Bank bridge over the Mullica River at mile 15.0 between Atlantic and Burlington Counties, New Jersey. This change will extend the existing winter seasonal restrictions into April and require four hours advance notice of all bridge openings during this period. This change is being proposed because there have been few requests for bridge openings during the winter months. The proposed change, if adopted, will relieve the bridge owner of the responsibility of having a bridgetender constantly on duty during a time of year when there is no demonstrated need for one, and will still provide for the reasonable needs of navigation throughout the year.

DATES: Comments must be received on or before May 15, 1995.

ADDRESSES: Comments may be mailed to Commander (ob), Fifth Coast Guard District, c/o Commander (obr), First Coast Guard District, Bldg. 135A, Governors Island, New York 10004-5073. The comments will become part of this docket and will be available for inspection and copying by appointment at Bldg. 135A, Governors Island, New York 10004-5073. Normal office hours are between 7 a.m. and 3:30 p.m., Mondays through Fridays, except Federal holidays. Comments may also be hand-delivered to this address.

FOR FURTHER INFORMATION CONTACT: Gary Kassof, Bridge Administrator—NY, Fifth Coast Guard District, (212) 668-7170.
