

*Legal Basis*

The proposed actions are authorized under sections 4(i), 4(j) and 303(r) of the Communications Act 47 U.S.C. 154(i), 154(j), and 303(r).

*Reporting, Recordkeeping and Other Compliance Requirements*

The proposed revision of 47 CFR Part 17 would require certain antenna structure owners to register their structures and to comply with the Commission's painting and lighting requirements. Additionally, each owner would have to provide a copy of the Antenna Structure Registration to all tenant licensees and post the structure's Registration Number at the site. Further, the proposed rules eliminate the requirement for certain licensees and permittees to individually file with the Commission to amend structure height or painting and lighting specifications. Most licensees and permittees, however, would have to provide the Registration Number of the structure from which they intend to transmit when filing for a new, modified, or renewed authorization.

*Federal Rules Which Overlap, Duplicate or Conflict With These Rules*

None.

*Description, Potential Impact, and Small Entities Involved*

Any rule change requiring a small business antenna structure owner to file an application for Registration could affect a small business. However, the overall impact, if any, will be minimal because the proposed registration process will eliminate the need for many small business licensees and permittees on an antenna structure to file certain applications and notifications. The Commission will further examine the impact of any rule changes on small entities after evaluating the comments in this proceeding.

*Any Significant Alternatives Minimizing the Impact on Small Entities Consistent With the Stated Objectives*

None.

[Docket No. 950203035-503501; I.D. 120594C]

#### Snapper-Grouper Fishery Off the Southern Atlantic States; Regulatory Amendment for Hogfish, Cubera Snapper, Gray Triggerfish

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Proposed rule.

**SUMMARY:** In accordance with the framework procedure for adjusting management measures of the Fishery

Management Plan for the Snapper-Grouper Fishery of the South Atlantic Region (FMP), NMFS proposes to establish a daily recreational bag limit of five hogfish per person; limit the harvest and possession of cubera snapper 30 inches (76.2 cm), total length, or larger to two per day; and establish a minimum size limit for gray triggerfish of 12 inches (30.5 cm), total length. These measures would apply only in the exclusive economic zone (EEZ) off the Atlantic coast of Florida. The intended effects of this rule are to rebuild the snapper-grouper resources and enhance enforcement.

**DATES:** Written comments must be received on or before March 2, 1995.

**ADDRESSES:** Comments on the proposed rule must be sent to Peter J. Eldridge, Southeast Regional Office, NMFS, 9721 Executive Center Drive N., St. Petersburg, FL 33702.

Requests for copies of the South Atlantic Fishery Management Council's (Council) regulatory document, which includes a regulatory impact review and an environmental assessment, should be sent to the Council, One Southpark Circle, Suite 306, Charleston, SC 29407-4699; FAX 803-769-4520.

**FOR FURTHER INFORMATION CONTACT:** Peter J. Eldridge, 813-570-5305.

**SUPPLEMENTARY INFORMATION:** Snapper-grouper species in the Atlantic Ocean off the southern Atlantic states (North Carolina to Florida) are managed under the FMP. The FMP was prepared by the South Atlantic Fishery Management Council (Council) and is implemented through regulations at 50 CFR part 646 under the authority of the Magnuson Fishery Conservation and Management Act (Magnuson Act).

### Background

The Council is concerned about the biological status of hogfish, cubera snapper, and gray triggerfish, especially off the Atlantic coast of Florida where recreational fishing pressure is intense. The majority of hogfish and cubera snapper catches occur off Florida, and a large portion of the gray triggerfish catch occurs off Florida. Gray triggerfish is overfished with an estimated spawning stock ratio (SSR) of 27 percent. Under the FMP, species with SSRs below 30 percent are considered overfished. The SSRs for cubera snapper and hogfish are unknown, but these species are thought to be overfished.

Florida implemented in its waters a harvest/possession limit for large cubera snapper on March 1, 1994, and a bag limit for hogfish on July 1, 1994. A size limit for gray triggerfish will be implemented on January 1, 1995. The
