DEPARTMENT OF AGRICULTURE

Forest Service

Carlota Copper Project, Tonto National Forest, Gila and Pinal Counties, AZ

AGENCY: Forest Service, USDA.

COOPERATING AGENCIES: Department of Defense, U.S. Army Corps of Engineers, Los Angeles District, Arizona Field Office.

Arizona Department of Environmental Quality.

ACTION: Revision of notice of intent to prepare an environmental impact statement.

SUMMARY: On June 9, 1992, the USDA, Forest Service, as lead agency, issued a Notice of Intent (NOI) to prepare an Environmental Impact Statement (EIS) for a proposal to develop a mine for copper extraction in the Pinto Creek/Powers Gulch area in the **Federal Register** (57 FR 24461). The purpose of this revised notice is to inform the publics of the following:

1. A revised release date for the draft and final EIS;
2. The availability of a Scoping Report document, and Update To Plan of

Operations, a Closure and Reclamation Plan and a revised Mine Site Plan further describing changes to the proposal;

3. The additional of the U.S. Army Corps of Engineers and the Arizona Department of Environmental Quality as cooperating agencies;

4. A change in the appeal regulations.

The draft EIS is now expected to be completed and available for public review in January, 1995. The final EIS is expected to be available in June, 1995.

Following several months of scoping and public meetings, a Scoping Report was completed in July, 1993, and mailed to all publics who had requested to be placed on the project mailing list. The initial plan of operations for the Carlota Mine was filed in February, 1992. As additional planning and engineering work was completed, and in response to agency and public comments and suggestions, the proponent submitted an Update to Plan of Operations in January, 1993, a revised Mine Site Plan dated 12/15/93, and a Closure and Reclamation Plan in June, 1994. Copies of the Scoping Report, Update to Plan of Operations, Mine Site Plan and Closure and Reclamation Plan are available for public review at the following locations: Forest Service Supervisor's Office, Phoenix, Arizona; Forest Service District Ranger's Office, Globe, Arizona.

The revisions will increase ore production and extend the life of the project. Based on review of those revisions, no new issues were evident which were not identified in the initial public scoping. Upon completion of the draft EIS, copies will be distributed to interested and affected agencies, organizations, and members of the public for their review and comment. The EPA will publish a Notice of Availability of the draft EIS in the Federal Register. The comment period on the draft EIS will be 45 days from the date the EPA publishes the Notice of Availability. It is very important that those interested in this proposed action participate at that time.

The U.S. Army Corps of Engineers and the Arizona Department of Environmental Quality are participating in the analysis process as cooperating agencies for the purposes of their permitting processes.

Effective November 4, 1993, in the **Federal Register** (58 FR 58904), a new

appeal regulation become effective. The decision on this proposed action will be subject to Forest Service appeal regulations (36 CFR part 215).

RESPONSIBLE OFFICIAL: The responsible official who will make the decision regarding this proposal is Charles R. Bazan, Forest Supervisor, Tonto National Forest, 2324 E. McDowell, Phoenix, Arizona 85006. He will decide under what circumstances the mining operations may proceed.

SUPPLEMENTARY INFORMATION: The original plan proposed three open pits over 370 acres. The revised plan proposes four open pits over 435 acres. Disturbance area has increased from approximately 1250 acres to 1447 acres. The ore reserves have increased from 54–70 million tons to 100 million tons. Mine rock (overburden or nonmineralized rock to be removed) increased from 130 million to 211 million tons, however, the extent of mine rock dumps will not be increased due to the proposed partial backfilling of the pits. The project life has increased from 10–12 years to 18 years and the number of employees increased from 225 to 280–300. The mining rate has increased from 19 million tons per year to 24 million tons per year. The separate leach solution and overflow ponds have been incorporated within the leach pad so only the raffinate solution pond will be exposed. The estimated average annual water requirement of 750 gallons per minute has not substantially increased although dry-period demands are estimated to reach 1200 gallons per minute. Locations of access roads, powerline corridors and facilities have also been relocated.

Dated: December 15, 1994.

Charles R. Bazan,

Forest Supervisor.

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: 1995 Census Test – Integrated Coverage Measurement (Housing Unit Follow-up).

Form Number(s): DG–1377.

Agency Approval Number: None.

Type of Request: New collection—EXPEDITED REVIEW.

Burden: 330.

Number of Respondents: 2,241.

Avg Hours Per Response: 5 minutes.

Needs and Uses: Prompted by the need to improve estimation techniques during the decennial census, the Census Bureau has developed an Integrated Coverage Measurement (ICM) approach to be tested during the 1995 Census Test. The ICM approach will utilize a separately sampled group of blocks within the 1995 Census Test sites which will be independently listed and then interviewed in addition to being enumerated in the census test. We will reconcile differences between the independent roster obtained in the ICM interviews and the census test results. This reconciliation will allow us to measure our coverage of persons in missed housing units and coverage of persons missed within housing units enumerated in the census test. Before ICM interviews are conducted, the independent listing will be enhanced by matching to existing census records. We will use the Housing Unit Follow-up Form to resolve non-matches and duplicate addresses. ICM interviews will then be conducted at housing units on the “enhanced listing.”

Affected Public: Individuals or households.

Frequency: One-time.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.

Copies of the above information collection proposal can be obtained by calling or writing Gerald Taché, DOC Forms Clearance Officer, (202) 482–3271, Department of Commerce, room 5312, 14th and Constitution Avenue, NW, Washington, DC 20230.

Dated: February 9, 1995.
