Approval and Promulgation of State Implementation Plans: Alaska

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: The EPA proposes to approve regulations from three submittals received from the Alaska Department of Environmental Conservation (ADEC): submittal dated July 17, 1990 requesting our action to address out-of-date sections found in 40 CFR 52.73-5296 relating to Alaska state implementation plan (SIP) deficiencies, and including the applicable Alaska statutes to support their request; submittal dated October 15, 1991 requesting approval of amendments to regulations dealing with

Air Quality Control, 18 AAC 50, for inclusion into Alaska's SIP to assure compliance with Federal ambient air quality standards for airborne particulate matter, and submittal dated March 24, 1994 requesting approval of additional amendments to 18 AAC 50, Air Quality Control, for inclusion into Alaska's SIP to assure compliance with new source review permitting requirements, the 1990 Clean Air Act Amendments (the Act), for sources located in nonattainment areas for either carbon monoxide or particulate matter. In the Final Rules Section of this **Federal Register**, the EPA is approving these SIP revisions as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. [IC Docket No. 94-31; FCC No. 95-36]

Preparation for International ITU World Radiocommunication Conferences

AGENCY: Federal Communications Commission.

ACTION: Second notice of inquiry.

SUMMARY: The International Telecommunication Union (ITU) will convene the 1995 World Radiocommunication Conference (WRC-95) from October 23 to November 17, 1995, in Geneva, Switzerland. The agenda for WRC-95 includes issues relating to the introduction of global mobile-satellite services (MSS); simplification of the international Radio Regulations; and agendas for future conferences. This proceeding addresses technical, regulatory, and procedural matters related to the WRC-95 agenda and solicits information to assist the Federal Communications Commission (FCC) in preparing U.S. proposals for that conference, including proposals for future conference agendas.

DATES: Comments must be filed on or before March 6, 1995, and reply comments must be filed on or before March 21, 1995.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT:

Damon C. Ladson, International Bureau, (202) 739-0510, or Audrey L. Allison, International Bureau, (202) 739-0557.

SUPPLEMENTARY INFORMATION: This is a summary of the FCC's *Second Notice of Inquiry*, IC Docket No. 94-31, FCC No. 95-36, adopted January 30, 1995, and released January 31, 1995. The full text of this *Second Notice of Inquiry* is available for inspection during normal business hours in the Records Room of the Federal Communications Commission, Room 239, 1919 M St. NW., Washington, DC. Summary of Second Notice of Inquiry

1. The purpose of this proceeding is to solicit comments addressing technical, operational, regulatory and procedural matters relating to the WRC-95 agenda issues in order to assist the FCC in its preparation of draft recommended U.S. proposals for WRC-95. In the *Second Notice of Inquiry*, the FCC reviews comments and replies submitted in response to the initial *Notice of Inquiry* in this proceeding 59 FR 25873, May 18, 1994 and the interim report of the FCC's WRC-95 Industry Advisory Committee. The FCC seeks further comment on these matters and on the FCC draft recommended U.S. proposals for WRC-95 attached to the *Second Notice of Inquiry*. Presentation of the FCC's preliminary views on these topics is intended to stimulate discussions and is part of an overall effort to achieve early consensus on U.S. proposals to WRC-95.

2. WRC-95 will be the first conference under the ITU's new accelerated conference cycle to discuss substantive spectrum allocation and regulatory matters. This conference represents a significant opportunity to build a foundation for advancing near and long-term United States telecommunications goals. In particular, WRC-95 is critical to a new commercial telecommunications industry—the mobile-satellite services (MSS) industry, that includes low-Earth orbit (LEO) MSS systems. LEO systems can provide voice, data and other services at relatively low cost and will be a critical component in achieving the FCC's goals of universal service, open access and competition in the provision of services. The systems will be an important part of a new seamless, nationwide (and
