BILLING CODE 6560-50-P

40 CFR Part 52

[CA 102-6-6837b; FRL-5145-6]

Approval and Promulgation of State Implementation Plans; California State Implementation Plan Revision, Bay Area Air Quality Management District

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

SUMMARY: EPA is proposing to approve a revision to the California State Implementation Plan (SIP), which concerns the control of volatile organic compound (VOC) emissions from valves and flanges at chemical plants.

The intended effect of proposing approval of this rule is to regulate emissions of VOCs in accordance with the requirements of the Clean Air Act, as amended in 1990 (CAA or the Act). In the Final Rules Section of this **Federal Register**, the EPA is approving the state's SIP revision as a direct final rule without prior proposal because the Agency views this as a noncontroversial revision amendment and anticipates no adverse comments. A detailed rationale for this approval is set forth in the direct final rule. If no adverse comments are received in response to this proposed rule, no further activity is contemplated in relation to this rule. If EPA receives adverse comments, the direct final rule will be withdrawn and all public comments received will be addressed in a subsequent final rule based on this proposed rule. The EPA will not institute a second comment period on this document. Any parties interested in commenting on this action should do so at this time.

DATES: Comments on this proposed rule must be received in writing by March 20, 1995.

ADDRESSES: Written comments on this action should be addressed to: Daniel A. Meer, Rulemaking Section (A-5-3), Air and Toxics Division, U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105-3901.

Copies of the rule and EPA's evaluation report of the rule are available for public inspection at EPA's Region 9 office during normal business hours. Copies of the submitted rule are also available for inspection at the following locations:

California Air Resources Board, Stationary Source Division, Rule Evaluation Section, 2020 "L" Street, Sacramento, CA 95812.
Bay Area Air Quality Management District, 939 Ellis Street, San Francisco, CA 94109.

FOR FURTHER INFORMATION CONTACT:

Duane F. James, Rulemaking Section (A-5-3), Air and Toxics Division, U.S. Environmental Protection Agency, Region 9, 75 Hawthorne Street, San Francisco, CA 94105-3901, Telephone: (415) 744-1191.

SUPPLEMENTARY INFORMATION: This document concerns Bay Area Air Quality Management District's (BAAQMD) Rule 8-22, "Valves and Flanges at Chemical Plants," submitted to EPA on September 28, 1994, by the California Air Resources Board. For further information, please see the information provided in the Direct Final action which is located in the Rules section of this **Federal Register**.

Authority: 42 U.S.C. 7401-7671q.

Dated: January 17, 1995.

Felicia Marcus,

Regional Administrator.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Chapter I

[IC Docket No. 94-31; FCC No. 95-36]

Preparation for International ITU World Radiocommunication Conferences

AGENCY: Federal Communications Commission.

ACTION: Second notice of inquiry.

SUMMARY: The International Telecommunication Union (ITU) will convene the 1995 World Radiocommunication Conference (WRC-95) from October 23 to November 17, 1995, in Geneva, Switzerland. The agenda for WRC-95 includes issues relating to the introduction of global mobile-satellite services (MSS); simplification of the international Radio Regulations; and agendas for future conferences. This proceeding addresses technical, regulatory, and procedural matters related to the WRC-95 agenda and solicits information to assist the Federal Communications Commission (FCC) in preparing U.S. proposals for that conference, including proposals for future conference agendas.

DATES: Comments must be filed on or before March 6, 1995, and reply comments must be filed on or before March 21, 1995.

ADDRESSES: Federal Communications Commission, 1919 M Street NW., Washington, DC 20554.

FOR FURTHER INFORMATION CONTACT:

Damon C. Ladson, International Bureau, (202) 739-0510, or Audrey L. Allison, International Bureau, (202) 739-0557.

SUPPLEMENTARY INFORMATION: This is a summary of the FCC's *Second Notice of Inquiry*, IC Docket No. 94-31, FCC No. 95-36, adopted January 30, 1995, and released January 31, 1995. The full text of this *Second Notice of Inquiry* is available for inspection during normal business hours in the Records Room of the Federal Communications Commission, Room 239, 1919 M St. NW., Washington, DC. The complete text may be purchased from the Commission's copy contractor, ITS, Inc., 2100 M St. NW., Suite 140, Washington, DC 20037, telephone (202) 857-3800.

Summary of Second Notice of Inquiry

1. The purpose of this proceeding is to solicit comments addressing technical, operational, regulatory and procedural matters relating to the WRC-95 agenda issues in order to assist the FCC in its preparation of draft recommended U.S. proposals for WRC-95. In the *Second Notice of Inquiry*, the FCC reviews comments and replies submitted in response to the initial *Notice of Inquiry* in this proceeding 59 FR 25873, May 18, 1994 and the interim report of the FCC's WRC-95 Industry Advisory Committee. The FCC seeks further comment on these matters and on the FCC draft recommended U.S. proposals for WRC-95 attached to the *Second Notice of Inquiry*. Presentation of the FCC's preliminary views on these topics is intended to stimulate discussions and is part of an overall effort to achieve early consensus on U.S. proposals to WRC-95.

2. WRC-95 will be the first conference under the ITU's new accelerated conference cycle to discuss substantive spectrum allocation and regulatory matters. This conference represents a significant opportunity to build a foundation for advancing near and long-term United States telecommunications goals. In particular, WRC-95 is critical to a new commercial telecommunications industry—the mobile-satellite services (MSS) industry, that includes low-Earth orbit (LEO) MSS systems. LEO systems can provide voice, data and other services at relatively low cost and will be a critical component in achieving the FCC's goals of universal service, open access and competition in the provision of services. The systems will be an important part of a new seamless, nationwide (and
