

appeal regulation become effective. The decision on this proposed action will be subject to Forest Service appeal regulations (36 CFR part 215).

RESPONSIBLE OFFICIAL: The responsible official who will make the decision regarding this proposal is Charles R. Bazan, Forest Supervisor, Tonto National Forest, 2324 E. McDowell, Phoenix, Arizona 85006. He will decide under what circumstances the mining operations may proceed.

SUPPLEMENTARY INFORMATION: The original plan proposed three open pits over 370 acres. The revised plan proposes four open pits over 435 acres. Disturbance area has increased from approximately 1250 acres to 1447 acres. The ore reserves have increased from 54–70 million tons to 100 million tons. Mine rock (overburden or nonmineralized rock to be removed) increased from 130 million to 211 million tons, however, the extent of mine rock dumps will not be increased due to the proposed partial backfilling of the pits. The project life has increased from 10–12 years to 18 years and the number of employees increased from 225 to 280–300. The mining rate has increased from 19 million tons per year to 24 million tons per year. The separate leach solution and overflow ponds have been incorporated within the leach pad so only the raffinate solution pond will be exposed. The estimated average annual water requirement of 750 gallons per minute has not substantially increased although dry-period demands are estimated to reach 1200 gallons per minute. Locations of access roads, powerline corridors and facilities have also been relocated.

Dated: December 15, 1994.

Charles R. Bazan,

Forest Supervisor.

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: 1995 Census Test – Integrated Coverage Measurement (Housing Unit Follow-up).

Form Number(s): DG–1377.

Agency Approval Number: None.

Type of Request: New collection—EXPEDITED REVIEW.

Burden: 330.

Number of Respondents: 2,241.

Avg Hours Per Response: 5 minutes.

Needs and Uses: Prompted by the need to improve estimation techniques during the decennial census, the Census Bureau has developed an Integrated Coverage Measurement (ICM) approach to be tested during the 1995 Census Test. The ICM approach will utilize a separately sampled group of blocks within the 1995 Census Test sites which will be independently listed and then interviewed in addition to being enumerated in the census test. We will reconcile differences between the independent roster obtained in the ICM interviews and the census test results. This reconciliation will allow us to measure our coverage of persons in missed housing units and coverage of persons missed within housing units enumerated in the census test. Before ICM interviews are conducted, the independent listing will be enhanced by matching to existing census records. We will use the Housing Unit Follow-up Form to resolve non-matches and duplicate addresses. ICM interviews will then be conducted at housing units on the “enhanced listing.”

Affected Public: Individuals or households.

Frequency: One-time.

Respondent's Obligation: Mandatory.

OMB Desk Officer: Maria Gonzalez, (202) 395–7313.
