Northeast Nuclear Energy Co.; Notice of Issuance of Amendment To Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 103 to Facility Operating License No. NPF-49 issued to Northeast Nuclear Energy Company (the licensee), which revised the Technical Specifications (TS) for operation of the Millstone Nuclear Power Station, Unit No. 3 located in New London County,

Connecticut. The amendment is effective as of the date of issuance.

The amendment modified TS 3.5.2.a to allow a one-time extension of the allowable Residual Heat Removal (RHR) pump outage time for the purpose of mechanical seal replacement and its related modifications. The allowable outage time is extended from 72 hours to 120 hours, may only be used one time per pump, and is not valid after April 30, 1995. The amendment clearly defines the times in which each RHR pump and associated RHR heat exchanger must be restored to an operable state.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on October 14, 1994 (59 FR 52200). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of the amendment will not have a significant effect on the quality of the human environment (60 FR 7800).
