

Employment Standards Administration**Wage and Hour Division; Minimum Wages for Federal and Federally Assisted Construction; General Wage Determination Decisions**

General wage determination decisions of the Secretary of Labor are issued in accordance with applicable law and are based on the information obtained by the Department of Labor from its study of local wage conditions and data made available from other sources. They specify the basic hourly wage rates and fringe benefits which are determined to be prevailing for the described classes of laborers and mechanics employed on construction projects of a similar character and in the localities specified therein.

The determinations in these decisions of prevailing rates and fringe benefits have been made in accordance with 29 CFR part 1, by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR part 1, Appendix, as well as such additional statutes as may from time to time be enacted containing provisions for the payment of wages determined to be prevailing by the Secretary of Labor in accordance with the Davis-Bacon Act. The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public comment procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in the effective date as prescribed in that section, because the necessity to issue current construction industry wage determinations frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General wage determination decisions, and modifications and supersedeas decisions thereto, contain no expiration dates and are effective from their date of notice in the **Federal Register**, or on the date written notice is received by the agency, whichever is earlier. These decisions are to be used in accordance with the provisions of 29 CFR parts 1 and 5. Accordingly, the applicable decision, together with any

modifications issued, must be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR part 5. The wage rates and fringe benefits, notice of which is published herein, and which are contained in the Government Printing Office (GPO) document entitled "General Wage Determinations Issued Under The Davis-Bacon And Related Acts," shall be the minimum paid by contractors and subcontractors to laborers and mechanics.

Any person, organization, or governmental agency having an interest in the rates determined as prevailing is encouraged to submit wage rate and fringe benefit information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Wage and Hour Division, Division of Wage Determinations, 200 Constitution Avenue, NW., Room S-3014, Washington, DC 20210.

**NUCLEAR REGULATORY
COMMISSION**

**Documents Containing Reporting or
Recordkeeping Requirements: Office
of Management and Budget Review**

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to OMB for review the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new revision, or extension: Revision.

2. The title of information collection: 10 CFR 50, Revision of Appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors."

3. The form number if applicable: Not applicable.

4. How often the data collection is required: Licensees will be required to keep an on-site implementation plan with records of analyses to justify their performance-based test programs and to monitor for effectiveness.

5. Who will be required or asked to report: Commercial power reactor licensees.

6. Estimate of the number of responses: This rulemaking would eliminate about 33 responses annually.

7. An estimate of the total number of hours needed annually to complete the requirement or request: Net burden reduction as follows: 4,583 hours per year for all power reactor licensees, including those facilities choosing the proposed option, for an average of about 42 hours per reactor licensee per year.

8. An indication of whether Section 3504(h), Pub L. 96-511 applies: Applicable

9. Abstract: The NRC is proposing to amend its regulations to reduce the frequency of containment structure leak rate testing. This rulemaking allows power reactor licensees to adopt Option B of Appendix J which (a) decreases the frequency of containment structure integrated leak testing (Type A), (b) provides an option to licensees for establishing Type B and C local leak test frequencies based on the performance history of the components (which is expected to result in a decrease in testing frequency for a majority of the components), (c) and eliminates the need for reporting test results to the NRC. The revised Appendix J requires
