NUCLEAR REGULATORY COMMISSION**Documents Containing Reporting or Recordkeeping Requirements: Office of Management and Budget Review**

AGENCY: Nuclear Regulatory Commission.

ACTION: Notice of the Office of Management and Budget review of information collection.

SUMMARY: The Nuclear Regulatory Commission (NRC) has recently submitted to OMB for review the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. Chapter 35).

1. Type of submission, new revision, or extension: Revision.

2. The title of information collection: 10 CFR 50, Revision of Appendix J, "Primary Reactor Containment Leakage Testing for Water-Cooled Power Reactors."

3. The form number if applicable: Not applicable.

4. How often the data collection is required: Licensees will be required to keep an on-site implementation plan with records of analyses to justify their performance-based test programs and to monitor for effectiveness.

5. Who will be required or asked to report: Commercial power reactor licensees.

6. Estimate of the number of responses: This rulemaking would eliminate about 33 responses annually.

7. An estimate of the total number of hours needed annually to complete the requirement or request: Net burden reduction as follows: 4,583 hours per year for all power reactor licensees, including those facilities choosing the proposed option, for an average of about 42 hours per reactor licensee per year.

8. An indication of whether Section 3504(h), Pub L. 96-511 applies: Applicable

9. Abstract: The NRC is proposing to amend its regulations to reduce the frequency of containment structure leak rate testing. This rulemaking allows power reactor licensees to adopt Option B of Appendix J which (a) decreases the frequency of containment structure integrated leak testing (Type A), (b) provides an option to licensees for establishing Type B and C local leak test frequencies based on the performance history of the components (which is expected to result in a decrease in testing frequency for a majority of the components), (c) and eliminates the need for reporting test results to the NRC. The revised Appendix J requires
