**SUPPLEMENTARY INFORMATION:**

**History**

On December 5, 1994, the FAA proposed to amend part 71 of Federal Aviation Regulations (14 CFR part 71) to establish Class E airspace area at Pangborn Memorial Airport, Wenatchee, Washington (59 FR 62365). Interested parties were invited to participate in the rulemaking proceeding by submitting written comments on the proposal. No comments were received. However, in the proposal one line was inadvertently omitted in the airspace description. The line has been inserted and comments are again solicited. After review of any comments and, if the FAA finds that further changes are appropriate, it will initiate rulemaking proceedings to extend the effective date or to amend the regulation.

Comments that provide the factual basis supporting the views and suggestions presented are particularly helpful in evaluating the effects of the rule, and in determining whether additional rulemaking is required. Comments are specifically invited on the overall regulatory, aeronautical, economic, environmental, and energy-related aspects of the rule which might suggest the need to modify the rule.

The coordinates for this airspace docket are based on North American

Datum 83. Class E airspace areas extending upward from 700 feet or more above the surface of the earth are published in Paragraph 6005 of FAA Order 7400.9B dated July 18, 1994, and effective September 16, 1994, which is incorporated by reference in 14 CFR 71.1. This action is necessary to accommodate a new instrument approach procedure at Pangborn Memorial Airport. The area will be depicted on aeronautical charts for pilot reference. The Class E airspace designation listed in this document will be published subsequently in the Order.

**The Rule**

This amendment to part 71 of Federal Aviation Regulations amends Class E airspace at Wenatchee, Washington. The FAA has determined that this regulation only involves an established body of technical regulations for which frequent and routine amendments are necessary to keep them operationally current. It, therefore, (1) is not a “significant regulatory action” under Executive Order 12866; (2) is not a “significant rule” under DOT Regulatory Policies and Procedures (44 FR 11034; February 26, 1979); and (3) does not warrant preparation of a regulatory evaluation as the anticipated impact is so minimal. Since this is a routine matter that will only affect air traffic procedures and air navigation, it is certified that this rule will not have a significant economic impact on a substantial number of small entities under the criteria of the Regulatory Flexibility Act.

[Docket No. 28074; Amdt. No. 1651]

**Standard Instrument Approach  
Procedures; Miscellaneous  
Amendments**

**AGENCY:** Federal Aviation  
Administration (FAA), DOT.

**ACTION:** Final rule.

**SUMMARY:** This amendment establishes, amends, suspends, or revokes Standard Instrument Approach Procedures (SIAPs) for operations at certain airports. These regulatory actions are needed because of changes occurring in the National Airspace System, such as the commissioning of new navigational facilities, addition of new obstacles, or changes in air traffic requirements. These changes are designed to provide safe and efficient use of the navigable airspace and to promote safe flight operations under instrument flight rules at the affected airports.
