ACTION: Notice of issuance of advisory circular.

SUMMARY: This notice announces the reissuance of Advisory Circular (AC), No. 33-6, Weld Repair of Aluminum Crankcases and Cylinders of Piston Engines. The AC provides information and guidance concerning an acceptable method, but not the only method, for the development of process specifications for weld repairs on crankcases and cylinders of piston engines.

FOR FURTHER INFORMATION CONTACT: Locke Easton, Engine and Propeller Standards Staff, ANE-110, at the above address, telephone (617) 238-7113, fax (617) 238-7113.

SUPPLEMENTARY INFORMATION:

Background

This AC was formulated to provide guidelines for applicants in the development of repair procedures for weld repairs on crankcases and cylinders of piston engines. It addresses development of weld repairs which are not contained in the engine manufacturer's "Instructions for Continued Airworthiness" (Maintenance Manual). It provides guidance to clarify the areas which should be addressed by an applicant's repair procedure, and/or substantiating data when seeking an approval for weld repair on crankcases or cylinders.

This AC also includes information on critical areas of welding, qualifications of welders, inspection techniques, the thermal processes, and technical data required; and references industry and military specifications which are acceptable for use by repair stations as approved data.

This advisory circular, published under the authority granted to the Administrator by 49 U.S.C. 106(g), 49 U.S.C. App. 1354(a), 1421 and 1423, provides guidance for the development of process specifications for weld repairs on crankcases and cylinders of piston engines.

Issued in Burlington, Massachusetts, on February 2, 1995.
