

Because of these court rulings, it is very important that those interested in this proposed action participate by the close of the 45 day comment period so that substantive comments and objections are made available to the Forest Service at a time when it can meaningfully consider and respond to them in the final EIS.

To be most helpful, comments on the draft EIS should be as specific as possible and may address the adequacy of the statement or the merit of the alternatives discussed. Reviewers may wish to refer to the Council on Environmental Quality regulations for implementing the procedural provisions of the National Environmental Policy Act at 40 CFR 1503.3 in addressing these points.

Responsible Official: Robert L. Schrenk, Forest Supervisor, Kootenai National Forest, 506 US Highway 2 West, Libby, MT 59923 is the Responsible Official. I have delegated the responsibility to prepare the Little Wolf Fire Salvage and Restoration Environmental Impact Statement to Lawrence A. Frobert, District Ranger, Libby Ranger District. As the Responsible Official I will decide which, if any, of the proposed projects will be implemented. I will document the decision and reasons for the decision in the Record of Decision. That decision will be subject to Forest Service Appeal Regulations.

Dated: February 13, 1995.

Agency Form Under Review by the Office of Management and Budget

DOC has submitted to the Office of Management and Budget (OMB) for clearance the following proposal for collection of information under the provisions of the Paperwork Reduction Act (44 U.S.C. chapter 35).

Agency: Bureau of the Census.

Title: Current Population Survey — June 1995 Marital History and Fertility Supplement.

Agency Approval Number: 0607-0610.

Type of Request: Reinstatement, with change, of a previously approved collection for which approval has expired.

Burden: 5,035 hours.

Number of Respondents: 57,000.

Avg Hours Per Response: 5.3 minutes.

Needs and Uses: The Current Population Survey (CPS) is a survey conducted in a sample of approximately 57,000 households monthly throughout the United States. Data on demographic and labor force characteristics are collected from a sample of households which represent the U.S. population. The Bureau of the Census uses the data to compile monthly averages of

household size and composition, age, education, ethnicity, marital status and various other characteristics at the U.S. level. The Bureau of Labor Statistics also uses the data in its monthly calculations of employment and unemployment. The basic monthly questionnaire is periodically supplemented with additional questions which address specific needs. The marital history and fertility supplement provides data on marital stability and fertility and childbearing characteristics of female household members by various demographic characteristics. The data collected from this supplement are used primarily by government and private analysts to project future population growth, to analyze child spacing patterns and marital stability, and to assist policymakers in making decisions that are affected by changes in family size and composition. Questions on marital history have been asked in the CPS every 5 years since 1975. We have collected data on fertility and birth expectations in the CPS annually since 1971 (with the exception of 1989, 1991, and 1993).

Affected Public: Individuals or households.

Frequency: See above.

Respondent's Obligation: Voluntary.

OMB Desk Officer: Maria Gonzalez, (202) 395-7313.

Agency: Bureau of the Census.

Title: Advance Monthly Retail Sales Survey.

Form Number(s): B-104(92).

Agency Approval Number: 0607-0104.

Type of Request: Extension of a currently approved collection.

Burden: 3,363.

Number of Respondents: 3,363.

Avg Hours Per Response: 5 minutes.

Needs and Uses: The Bureau of the Census conducts the Advance Monthly Retail Sales Survey to collect monthly sales data from a national sample of retail establishments on a timely basis in order to provide an early indication of changes in current retail trade activity at the United States level. Policy makers such as the Federal Reserve Board need to have the most timely estimates in order to anticipate economic trends and act accordingly. The Bureau of the Census releases the advance sales estimates 9 days after the end of the data month in a press release called "Advance Monthly Retail Sales Report." Without these early estimates, the next available measure of retail sales is the "preliminary" estimate released about 40 days after the data month. Other users of the advance sales estimates include the Council of Economic Advisors, Bureau of Economic Analysis, Federal Reserve Board, other government agencies, and businesses.

Affected Public: Businesses or other for-profit organizations.

Frequency: Monthly.

Respondent's Obligation: Voluntary.

International Trade Administration [A-412-810]

Certain Hot-Rolled Lead and Bismuth Carbon Steel Products From the United Kingdom; Preliminary Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of preliminary results of antidumping duty administrative review.

SUMMARY: In response to a request by a manufacturer/exporter, United Engineering Steels Limited (UES), the Department of Commerce (the Department) is conducting the first administrative review of the antidumping duty order on certain hot-rolled lead and bismuth carbon steel products (lead and bismuth steel) from the United Kingdom (U.K.). The review covers one manufacturer/exporter, UES, and entries of the subject merchandise into the United States during the period September 28, 1992 through February 28, 1994. We have preliminarily determined that sales have been made below the foreign market value (FMV). If these preliminary results are adopted in our final results of administrative review, we will instruct U.S. Customs to assess antidumping duties equal to the difference between the United States price (USP) and the FMV.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: February 23, 1995.

FOR FURTHER INFORMATION CONTACT: Nooshen Amiri or Maureen Flannery, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230; telephone: (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

On March 4, 1994, the Department published in the FEDERAL REGISTER (59 FR 10368) a notice of "Opportunity to Request an Administrative Review" of the antidumping duty order on lead and bismuth steel from the U.K. (58 FR 15324). On March 31, 1994, a manufacturer/exporter, UES, requested that we conduct an administrative review in accordance with section 353.22(a) of the Department's regulations (19 CFR 353.22(a)). We published the notice of initiation of the antidumping duty administrative review

on April 15, 1994 (59 FR 18099), covering the period September 28, 1992 through February 28, 1994. The Department has now conducted the review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Review

The products covered by this review are hot-rolled bars and rods of nonalloy or other alloy steel, whether or not descaled, containing by weight 0.03 percent or more of lead or 0.05 percent of bismuth, in coils or cut lengths, and in numerous shapes and sizes. Excluded from the scope of this review are other alloy steels (as defined by the *Harmonized Tariff Schedule of the United States* (HTSUS) Chapter 72, note 1 (f)), except steels classified as other alloy steels by reason of containing by weight 0.4 percent or more of lead, or 0.1 percent or more of bismuth, tellurium, or selenium. Also excluded are semi-finished steels and flat-rolled products. Most of the products covered in this review are provided for under subheadings 7213.20.00 and 7214.30.00.00 of the HTSUS. Small quantities of these products may also enter the United States under the following HTSUS subheadings: 7213.31.30.00, 60.00; 7213.39.00.30, 00.60, 00.90; 7214.40.00.10, 00.30, 00.50; 7214.50.00.10, 00.30, 00.50; 7214.60.00.10, 00.30, 00.50; and 7228.30.80.00. HTSUS subheadings are provided for convenience and Customs purposes. The written product description remains dispositive.

This review covers sales of the subject merchandise manufactured by UES and entered into the United States during the period September 28, 1992 through February 28, 1994.

United States Price

The Department used purchase price (PP), as defined in section 772 of the Act, in calculating USP for UES because all sales were made directly to unrelated parties prior to importation into the United States. USP was based on packed, delivered prices to customers in the United States. We made deductions, where applicable, for cash discounts, rebates, foreign inland freight, FOB charges in the U.K., ocean freight, marine insurance, U.S. Customs duties and merchandise processing fees, harbor maintenance fees, brokerage and handling charges, and U.S. inland freight charges. We also made an adjustment for invoice corrections (billing adjustments) made after shipment. While UES's shipments to the United States are transported by a related carrier, British Steel Shipping,
