Connecticut Yankee Atomic Power Co.; Notice of Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (Commission) has issued Amendment No. 182 to Facility Operating License No. DPR-61 issued to Connecticut Yankee Atomic Power Company (the licensee), which revised the Technical Specifications for operation of the Haddam Neck Plant located in Middlesex County, Connecticut. The amendment is effective as of the date of issuance, to be implemented within 30 days.

The amendment revises Technical Specification 3/4.4.9, "Pressure/Temperature Limits, Reactor Coolant System," Figures 3.4-3, 4, and 5 and the associated Bases section. The amendment replaces these TS figures as a result of reanalyses in response to NRC Information Notice 93-58, "Nonconservatism in Low Temperature Overpressurization Protection for Pressurized Water Reactors."

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment.

Notice of Consideration of Issuance of Amendment and Opportunity for Hearing in connection with this action was published in the **Federal Register** on May 16, 1994 (59 FR 25507). No request for a hearing or petition for leave to intervene was filed following this notice.

The Commission has prepared an Environmental Assessment related to the action and has determined not to prepare an environmental impact statement. Based upon the environmental assessment, the Commission has concluded that the issuance of this amendment will not have a significant effect on the quality of the human environment (60 FR 7588).
