**Common Sense Initiative Council,
Petroleum Refining Sector
Subcommittee; Meeting**

AGENCY: Environmental Protection Agency (EPA).

ACTION: Common Sense Initiative Council, Petroleum Refining Sector Subcommittee; notice of meeting.

SUMMARY: The Environmental Protection Agency established the Common Sense Initiative Council (CSIC) on October 17, 1994 to provide independent advice and counsel to EPA on environmental issues associated with the petroleum refining industry and other industrial sectors. The charter for the CSIC was authorized through October 17, 1996, under regulations established by the Federal Advisory Committee Act (FACA). The Petroleum Refining Sector (PRS) Subcommittee operates as a subcommittee of the CSIC.

OPEN MEETING NOTICE: Notice is hereby given that the CSIC-PRS Subcommittee will hold an open meeting on Friday March 10, 1995, from 8 a.m. to 3 p.m. at the Radisson Inn Hotel, 2150 Veterans Blvd., Kenner, LA 70062, [1-800-333-3333 or 504-467-3111]. The purpose of the meeting is to further define areas on which the CSIC-PRS will focus. The Subcommittee will also convene in working groups to begin identifying specific issues. Seating will be available on a first come, first served basis.

INSPECTION OF SUBCOMMITTEE

DOCUMENTS: Documents relating to the topics above will be publicly available at the meeting. Thereafter, these documents, together with the CSIC-PRS meeting minutes, will be available for public inspection in room 2417M of EPA Headquarters, 401 M Street SW., Washington, DC.

FOR FURTHER INFORMATION: Anyone who would like further information should contact the Common Sense Initiative Program Staff office by phone on (202) 260-417, or by FAX on (202) 260-766. Members of the public may submit written comments of any length prior to the meeting. One hour of meeting time will be set aside for oral presentations.

Each individual or group making an oral presentation will be limited to a total of five minutes. Attendees should provide their names and telephone numbers to the Common Sense Initiative Program Staff so that the Agency can advise them of any schedule changes.

Date: February 16, 1995.

Prudence Goforth,

CSIC/Designated Federal Officer.

**Science Advisory Board
Environmental Engineering Committee
and Subcommittee; Open Meetings**

March 8-10, 1995.

Pursuant to the Federal Advisory Committee Act, Public Law 92-463, notice is hereby given that the OSWER Exposure Model Subcommittee of the Science Advisory Board's (SAB's) Environmental Engineering Committee (EEC), will meet Wednesday March 8 and that the full Committee (EEC) will meet Thursday and Friday March 9-10, 1995. The meetings will begin each day at 8:30 a.m. The meetings will be held at the One Washington Circle Hotel, Washington Circle, NW., Washington, DC (Hotel telephone is 202/872-1680 or 800/424-9671). The meetings are open to the public and seating will be on a first come basis.

OSWER Exposure Model Subcommittee Meeting

On March 8 the Subcommittee will review the EPA's Composite Model for Leachate Migration with Transformation Products (EPACMTP) and the Finite Source Methodology. Copies of the documents to be reviewed are *not* available from the SAB; they can be obtained from Dr. Zubair Saleem, Office of Solid Waste (5304), U.S. Environmental Protection Agency, 401 M Street SW., Washington, DC 20460 (202/260-4767). The tentative charge to this subcommittee is as follows:

(a) EPACMTP is the latest and most advanced of the OSW subsurface fate and transport models designed to be computationally efficient for usage in monte carlo analysis for national rulemaking. The question of interest to EPA is the mathematical formulation in EPACMTP of the subsurface fate and transport of daughter products from degrading organic chemical constituents, and the appropriateness for EPA's use of this approach in establishing nation-wide exit levels for hazardous waste in future regulations.

(b) The Office of Solid Waste (OSW) has been using a national monte carlo procedure in which national distributions of parameters are used as input to the model. OSW has developed a regional site-based approach in which hydrogeologic parameters are selected from hydrogeologic regions and in general have cross-correlations. They are used as input to the model. Is this site-based approach better or should OSW continue to use the approach based on national distributions of input parameters?

(c) The OSW's most recently-used approach is based on an infinite source steady-state model. EPA has developed a finite-source approach for use with EPACMTP. OSW would like SAB comments on the adequacy of the approach for regulatory purposes.

(d) MINTEQ (metal speciation model) was developed by EPA. EPA has recently developed the linkage of the output of the model with EPACMTP to assess the subsurface fate and transport of metals. EPA would like SAB comments on the appropriateness of the use of this linkage for metals in EPA's national rulemaking efforts.

Environmental Engineering Committee Meeting

On March 9-10, the EEC will discuss its final draft report on the review of the Use Cluster Scoring System (UCSS) of the Office of Pollution Prevention and Toxics; receive briefings from the Agency on various programs; and plan the remainder of its FY95 activities. Copies of the EEC's draft UCSS report are available from Mrs. Dorothy Clark, address below.

Any member of the public wishing further information, such as a proposed agenda on either meeting should contact Mrs. Dorothy Clark, Secretary, Science Advisory Board (1400F), U.S. EPA, Washington, DC 20460, at 202/260-6552 or 202/260-7118 (fax). Written comments of any length may be provided up until the meetings, but 35 copies must be supplied. Members of the public who wish to make a brief oral presentation should contact Mrs. Kathleen Conway by phone 202/260-2558, or internet CONWAY.KATHLEEN@epamail.epa.gov no later than noon (eastern time) Wednesday March 1 in order to have time reserved on the agenda.

Dated: February 10, 1995.

A. Robert Flaak,

Acting Staff Director, Science Advisory Board.
