BILLING CODE 4160–01–F

21 CFR Part 558

Animal Drugs, Feeds, and Related Products; Melengestrol Acetate and Tylosin

AGENCY: Food and Drug Administration, HHS.

ACTION: Final rule.

SUMMARY: The Food and Drug Administration (FDA) is amending the animal drug regulations to reflect approval of a supplemental new animal drug application (NADA) filed by The Upjohn Co. The supplemental NADA provides for use of single ingredient Type A medicated articles containing melengestrol acetate (MGA) and tylosin to manufacture certain combination drug Type B and Type C medicated feeds for heifers fed in confinement for slaughter. The supplement provides for use of a dry MGA Type A article to make a dry Type B or Type C medicated feed.

EFFECTIVE DATE: March 1, 1995.

FOR FURTHER INFORMATION CONTACT: Jack Caldwell, Center for Veterinary Medicine (HFV–126), Food and Drug Administration, 7500 Standish Pl., Rockville, MD 20855, 301–594–1638.

SUPPLEMENTARY INFORMATION: The Upjohn Co., Kalamazoo, MI 49001, filed supplemental NADA 138–995, MGA with Tylan (MGA with tylosin), which provides for use of approved MGA and tylosin Type A medicated articles to make Type B and Type C medicated feeds for heifers being fed in confinement for slaughter. The supplement removes the requirement for making dry pelleted Type B or C medicated feed. Therefore, dry MGA and tylosin Type A articles may be used to make a dry Type B or C medicated feed containing MGA and tylosin.

This supplement is approved as of January 13, 1995. Accordingly, 21 CFR 558.342(c)(4)(ii)(C) is amended by removing the existing reference to a pelleted medicated feed to reflect this approval.

This is a manufacturing supplement to an approved NADA. Approval of this supplement does not require added safety or efficacy data or information. Therefore, a freedom of information summary as provided in part 20 (21 CFR part 20) and § 514.11(e)(2)(ii) (21 CFR 514.11(e)(2)(ii)) is not required.

Under section 512(c)(2)(F)(iii) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 360b(c)(2)(F)(iii)), this supplement for food-producing animals does not qualify for marketing exclusivity because the supplement does not contain new clinical or field investigations (other than bioequivalence or residue studies) and new human food safety studies (other than bioequivalence or residue studies) essential to the approval and conducted or sponsored by the applicant.

The agency has determined under 21 CFR 25.24(d)(1)(iii) that this action is of a type that does not individually or cumulatively have a significant effect on the human environment. Therefore, neither an environmental assessment nor an environmental impact statement is required.
