

strains to common commercial varieties for agronomic characteristics and fiber quality. There will be a maximum of 0.5 to 1 acre of transgenic planting per site. Research trials will be performed to: (1) Evaluate B.t. trait performance against target pests; (2) formulate plans for resistance management in B.t. cotton, and (3) provide recommendations for integrated pest management utilizing B.t. cotton. There will be a maximum of 0.5 to 2 acres of transgenic planting per site. Seed multiplication trials will be conducted for the purposes of ensuring seed purity for further research and development. There will be a maximum of 15 acres of transgenic planting per site.

Containment procedures will be employed to minimize dissemination via pollen transfer or seed dispersal. A non-transgenic border will be planted and maintained should cotton be present within 1,320 feet of the transgenic trial. Upon completion of the tests, all plants (transgenic, non-transgenic control lines, and non-transgenic buffer) will be destroyed via bush-hog, or shred and disk. Unused seed will be destroyed by incineration, autoclaving, plowed under, or returned to the designated seed company. Monitoring will occur through the next growing season. The occurrence of subsequent cotton volunteers will be destroyed by soil incorporation or herbicide application. Transgenic seed will be stored in marked bags. Equipment will be thoroughly cleaned before and after field trials.

The labeling proposed by Calgene, Inc. that would govern the conduct of the experiment states:

This package contains insect resistant cottonseed expressing a *Bacillus thuringiensis* subsp. *kurstaki* (B.t.k.) protein. B.t.k. protein is effective in controlling certain lepidopteran insects. For use only at an application site of a cooperator and in accordance with the terms and conditions of the Experimental Use Permit. This labeling must be in the possession of the user at the time of planting. Not for sale to any person other than a participant or cooperator of the EPA approved Experimental Use Permit Program. The contents may only be used according to the approved EUP program. Cooperators must have at least one copy of each applicable protocol prior to initiating any research with the contents.

Following the review of the Calgene, Inc. application and any comments received in response to this notice, EPA will decide whether to issue or deny the EUP request for this EUP program, and if issued, the conditions under which it is to be conducted. Any issuance of an EUP will be announced in the **Federal Register**.
