

during the draft supplemental environmental impact statement public review period, was evaluated in the FSEIS and determined not to be a significant "new and reasonable" alternative nor was it found to meet the necessary section 6(f)(3) replacement requirements.

It is determined by the NPS and State of Missouri that Alternative B (Little Creve Coeur Lake) as the preferred alternative, most closely meets the requirements of significant "additional land" for replacement of converted land at CCLMP. This alternative, 464.8 acres declared eligible for section 6(f)(3) consideration, is located to the west and south of Creve Coeur Lake Memorial Park and consists primarily of wetlands presently in agricultural use.

With the adoption of the above preferred alternative, added to the initial replacement package submitted by the State of Missouri, the total land replacement for land converted at CCLMP could amount to 723.28 acres at an estimated value of \$3,379,820. The approximate 207 acres of CCLMP land being converted has been valued at \$1,755,098.

Copies of the FSEIS may be obtained from the responsible official, Mr. William Schenk, Regional Director (refer to address below). Comments on the FSEIS must be received no later than March 26, 1995 and may be responded to in the Record of Decision.
