

the Service has received notice of an ivory quota for the year of export (50 CFR 17.40(e)(3)(iii)(A)). In addition, the trophy may not be imported unless the Service determines that the killing of the animal whose trophy is intended for import would enhance the survival of the species (50 CFR 17.40(e)(3)(iii)(C)). The Service has been able to make this finding for trophy import permit applications that have been submitted in the last few years.

### CITES

Also applicable to the Service's procedures is the CITES requirement that the import permit be issued before the export permit, and it is obviously desirable for the sportsman to obtain, or at least have reasonable assurance of obtaining, the necessary import and export permits before committing to the safari hunt. Consistent with revised Conf. 2.11(c), the U.S. Scientific Authority will accept a "not detrimental" finding of the exporting country for that year, unless there are scientific or management data to indicate otherwise. If the scientific or management data indicate a concern about the reasonableness of an exporting country's "not detrimental" finding, the Service will consult with that country's Scientific and Management Authorities. Obviously, for the Scientific Authority advice and the subsequent export permit issued by the Management Authority to be accepted, the exporting country must have designated its Scientific Authority.

This notice was prepared under the authority of the Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*)

Dated: March 2, 1995.
