Bureau of Land Management

Continental Divide Natural Gas Project; Wyoming; Environmental Impact Statement

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to Prepare an Environmental Impact Statement (EIS) and to Conduct Scoping for the Continental Divide Natural Gas Project, Carbon and Sweetwater Counties, Wyoming.

SUMMARY: Under section 102(2)(C) of the National Environmental Policy Act (NEPA) of 1969, as amended, the Bureau of Land Management (BLM), Rawlins District Office, will direct the preparation of an EIS on the potential impacts of a proposed natural gas field development project. Between 500 and 2,000 gas wells and associated facilities could be constructed on approximately 660,000 acres of private, Federal, and State lands, over a 10-year development period. The project area is located in Carbon and Sweetwater Counties, Wyoming. Affected Federal land is public land administered by the BLM Rawlins and Rock Springs Districts. The EIS will be prepared by a third party contractor.

DATES: Comments on the scoping process will be accepted through April 7, 1995. Public Scoping Meetings are not planned at this time.

ADDRESSES: Comments should be sent to Bureau of Land Management, Rawlins District Office, Walter E. George, Project Leader, 1300 3rd Street, P.O. Box 670, Rawlins, WY 82301.

FOR FURTHER INFORMATION CONTACT:

Bureau of Land Management, Walter E. George, Project Leader, 1300 3rd Street, P.O. Box 670, Rawlins, WY 82301, phone number 307-324-7171.

SUPPLEMENTARY INFORMATION: Amoco Production Company and other oil and gas companies have proposed a 10-year field development project. The proposed project area, referred to as the Continental Divide Area, is generally located in Townships 15 through 23 North, Ranges 91 through 99 West of Carbon and Sweetwater Counties in south-central Wyoming. The project area is located approximately 25 miles west of Rawlins and 40 miles east of Rock Springs and is bisected by Interstate Highway 80 from east to west. The project area is approximately 660,000 acres in size. Landownership is 52% Federal, 47% private, and 1% State. Federal land in the project is public land administered by the BLM Rawlins and Rock Springs Districts.

Four alternatives are proposed for analysis in the EIS. A low development alternative will analyze the impact of a possible 250 wells (one well for every four square miles). The proposed action will analyze the impact of a possible 1,250 wells (one well per square mile). A high development alternative will analyze the impact of a possible 2,000 wells (two wells per square mile). The no action alternative will also be analyzed.

If the project is approved, site-specific environmental assessments (EAs) will be tiered from this EIS for individual authorizations (Permits to Drill or Right-of-Way Grants). Drilling of exploratory or delineation wells on existing Federal leases will be permitted during the preparation of the EIS on a case-by-case basis. A site-specific EA will be prepared for each of these applications.

This EIS will consider cumulative impacts from other proposed oil and gas projects, especially recently completed EISs for the Mulligan Draw Gas Field Project, the Creston/Blue Gap Natural Gas Project, and the Greater Wamsutter II Natural Gas Project. Potential issues to be addressed in the EIS include, but are

not limited to: prevention of Federal mineral drainage, access road development and transportation management, erosion control, reclamation, protection of cultural resources, noxious weed control, impacts to wildlife populations and their habitat, and cumulative impacts.

Public comments and participation on three previous EISs adjacent to the Continental Divide Project area was low. Public scoping meetings were not held for these projects. No scoping meeting is scheduled for this project. Written comments on the scope and content of the EIS will be accepted until the close of the scoping period.

Dated: March 6, 1995.

State Director, Wyoming.
