Financial Assistance Award: Kemp Development Corporation

AGENCY: Department of Energy.

ACTION: Notice of Intent.

SUMMARY: The U.S. Department of Energy announces that pursuant to 10 CFR 600.6(a)(2) it is making a financial assistance award under Grant Number DE-FG01-95EE15622 to Kemp Development Corporation. The proposed grant will provide funding in the estimated amount of \$99,995 by the Department of Energy for the purpose of saving energy through development of the inventor's "Automated Thermal Treatment of Metals With a Mechanically Fluidized Vacuum Machine".

SUPPLEMENTARY INFORMATION: The Department of Energy has determined in accordance with 10 CFR 600.14(e)(1) that the unsolicited application for financial assistance submitted by Kemp Development Corporation is meritorious based on the general evaluation required by 10 CFR 600.14(d) and the proposed project represents a unique idea that would not be eligible for financial assistance under a recent, current or planned solicitation. The new technology is expected to provide energy savings of 50 percent and will incorporate a number of new features including computer control and rapid cooling. The inventor and principal investigator, Willard Kemp, is the president of Kemp Development Corporation. He has 54 U.S. patents in various fields and is a registered professional engineer in Ohio and Texas. Kemp Development Corporation will use its engineering facilities for designing, constructing, and operating the prototype unit. The proposed project is not eligible for financial assistance under a recent, current or planned solicitation because the funding program, the Energy Related Invention Program (ERIP), has been structured

since its beginning in 1975 to operate without competitive solicitations because the authorizing legislation directs ERIP to provide support for worthy ideas submitted by the public. The program has never issued and has no plans to issue a competitive solicitation.

Mark B. Whitaker,

Departmental Representative to the Defense Nuclear Facilities Safety Board.

The Honorable John T. Conway,
Chairman, Defense Nuclear Facilities Safety Board, 625 Indiana Avenue, NW., Suite 700, Washington, DC 20004

Dear Mr. Chairman: This is to advise you, pursuant to 42 USC 2286d(e), that the Department of Energy (Department) needs an additional 45 days to respond to the Defense Nuclear Facilities Safety Board Recommendation 94-2, Conformance with Safety Standards at Department of Energy Low-Level Nuclear Waste and Disposal Sites.

The Department has established a Headquarters/Field task force to develop the Implementation Plan, which is receiving considerable input from the field. An integrated systems approach is being used to develop the Implementation Plan. Discussions between the Department and the Board staff have been constructive in developing a responsive plan. However, a 45-day extension is required to more clearly define a cost-effective and efficient approach for conducting the complex-wide review necessary to establish the dimensions of the low-level waste disposal problem. The Implementation Plan for Recommendation 94-2 will be provided by March 31, 1995.

Sincerely,

Hazel R. O'Leary.
