

appropriate alternative strategy. Programmatically, ADC has proposed (and in some instances is already implementing) a number of measures, including:

- Environmental compliance training for supervisors and managers;
- The standardization of data collection and reporting;
- Consultation, monitoring, and periodic evaluations; and
- An outreach element, including publishing literature and providing training on the application of nonlethal wildlife damage control alternatives.

Many of the programmatic mitigation measures will be incorporated into ADC's site-specific environmental compliance documents and actions.

For possible mitigation at the local level, the final EIS listed 24 specific measures for consideration, for example:

- Placing greater emphasis on nonlethal animal damage control strategies and techniques;
- Insisting upon the use of more human capture devices and practices; and
- Proving nonlethal control tools to resource managers.

The complete listing provides a menu to which program decisionmakers may refer in various site-specific contexts.

### Conclusions

In this decision, I have determined that:

- All currently feasible Animal Damage Control program alternatives have been adequately developed and explored, although the program intends to continue searching for other environmentally preferable means of achieving its mission;
- Program decisionmakers will appropriately consider any significant environmental impacts and the viable alternatives developed in the final EIS in the context of the NEPA process for local actions;
- An environmental compliance system, including APHIS' new NEPA compliance procedures and ADC's specific accommodation of such procedures, will be implemented immediately;
- ADC will use the decisionmaking model explained in Chapter 2 of the final EIS and will follow CEQ regulations and the USDA, APHIS, and ADC NEPA compliance procedures.
- A satisfactory environmental mitigation strategy at both the programmatic and local level has been developed and will be implemented, as appropriate.

Executed in Washington, D.C., this 7th day of March 1995.

### Forest Service

#### Intergovernmental Advisory Committee Meeting

**AGENCY:** Forest Service, USDA.

**ACTION:** Notice of meeting.

**SUMMARY:** The Intergovernmental Advisory Committee (IAC) will meet on March 28 and 29, 1995, at the Sheraton Portland Airport Hotel, 8235 N.E. Airport Way, Portland, Oregon 97230. The purpose of the meeting is to discuss the role of the committee in the implementation of the Northwest Forest Plan. The meeting will begin at 1:30 p.m. on March 28 and continue until 4:30 p.m. It will resume at 8:30 a.m. on March 29, concluding at 3:00 p.m. Agenda items to be covered include: (1) background on the Northwest Forest Plan; (2) introduction of members and general orientation; (3) operating guidelines and ground rules; (4) a summary of actions taken by the federal agencies regarding plan implementation; and (5) a discussion of topics to be addressed at future meetings. The IAC meeting will be open to the public. Written comments may be submitted for the record at the meeting. Time will also be scheduled prior to adjourning on March 28 for brief oral public comments. Interested persons are encouraged to attend.

**FOR FURTHER INFORMATION CONTACT:** Questions regarding this meeting may be directed to Don Knowles, Executive Director, Regional Ecosystem Office, 333 SW 1st Avenue, P.O. Box 3623, Portland, OR 97208 (Phone: 503-326-6265).

Dated: March 7, 1995.

**Donald R. Knowles,**

*Designated Federal Official.*

### Natural Resources Conservation Service

#### PME-6 Southwest White Lake Shore Protection Demonstration Project

**AGENCY:** Natural Resources Conservation Service, formerly Soil Conservation Service.

**ACTION:** Notice of finding of no significant impact.

**SUMMARY:** Pursuant to Section 102(2)(C) of the National Environmental Policy Act of 1969; the Council on Environmental Quality Guidelines (40 CFR part 1500); and the Soil Conservation Service Guidelines (7 CFR part 650); the Natural Resources Conservation Service, U.S. Department of Agriculture, gives notice that an environmental impact statement is not being prepared for the Southwest White Lake Shore Protection Demonstration Project, Vermilion Parish, Louisiana.

#### FOR FURTHER INFORMATION CONTACT:

Donald W. Gohmert, State Conservationist, United States Department of Agriculture, Natural Resources Conservation Service, 3737 Government Street, Alexandria, Louisiana 71302; telephone (318) 473-7751.

**SUPPLEMENTARY INFORMATION:** The environmental evaluation of this federally assisted action indicates that the project will not cause significant local, regional, or national impacts on the environment. As a result of these findings, Donald W. Gohmert, State Conservationist, has determined that the preparation and review of an environmental impact statement are not necessary for this project.

This project concerns the stabilization and protection of the southwest shoreline of White Lake in Vermilion, Parish. The planned project work consists of planting emergent vegetation in shallow water at the lake's edge. As the vegetation becomes established, it will function as a buffer against the erosive wave energy created by the wide fetch of the lake and artificially high water levels. Shoreline erosion rates will be reduced and interior fresh marshes will remain protected from incorporation into White Lake.

The Notice of a Finding of No Significant Impact (FONSI) has been forwarded to the Environmental Protection Agency and to various Federal, State, and local agencies and interested parties. A limited number of copies of the FONSI are available to fill single copy requests at the above address. Basic data developed during the environmental evaluation are on file and may be reviewed by contacting Donald W. Gohmert.

No administrative action on implementation of the proposal will be taken until 30 days after the date of this publication in the **Federal Register**.

This activity is being conducted under the provisions of Public Law 101-646—Coastal
