

managing the storage and delivery of all types of domestic and international inbound shipments, managing long term storage, and evaluation of performance and customer satisfaction. Carrier functions include, but are not limited to, pre-move surveys, shipment packaging, onward shipment movement, storage-in-transit, long term storage, shipment delivery, shipment unpacking, and claims settlement.

Under this proposed contracting approach, subcontracting goals will be included to ensure capability (particularly during the peak season) and continued visibility of small, small disadvantaged, and women-owned carriers.

In formulating comments, the following issues should be considered: The ability to expand operations during emergencies or during peak shipping season; subcontracting, specifically to small, small and disadvantaged, and women-owned businesses; the ability to manage the movement of all types of personal property shipments, to include, but not limited to, unaccompanied baggage, household goods, mobile homes, and boats; the ability manage administrative processes, to include, but not limited to, methods for billing and payment of transportation and transportation related charges, direct settlement with property owners for loss and/or damage claims; establishment of rate structures; establishment of performance evaluation criterion; and management of long and short term storage.

If this alternative business practice is pursued, the carrier industry will also be afforded the opportunity to comment on a draft solicitation, as well as to attend pre-solicitation and pre-proposal conferences.
