Supplementary Information: This general management plan provides management objectives and visions for the entire park, with alternative plans for the park's developed areas (South Rim, North Rim, Tuweep, and corridor trails). The proposed action, the no-action alternative, and three other alternatives are presented in this document, and their environmental consequences are analyzed.

The proposed action (alternative 2) would emphasize regional cooperation for information distribution, regional resource preservation, and a quality visitor experience. A major shift away from the use of private automobiles

would occur. Alternative modes of transportation would be emphasized throughout the region, with staging areas linked to regional private transit services in outlying communities and a public transit system within the park. Private vehicles would be removed from the heaviest use areas in the park, creating pedestrian-only areas. The number of private vehicles allowed into the park at any one time would be limited in certain areas. The adaptive use of historic structures and other structures would be maximized. The construction of new facilities within the park would be almost entirely within disturbed areas. The visitor experience would be defined by the unique qualities of each individual area, and the number of visitors allowed into some areas of the park would be determined by a carrying capacity analysis. With respect to environmental consequences, the proposed action would stabilize the growth of infrastructure within the park, enhance natural and cultural resource preservation, improve significantly the visitor experience, create better living and working conditions for park employees, and benefit local economies.

The other alternatives include: Continuing existing conditions (the no-action alternative), a minimum requirements alternative (alternative 1), reduced development within the park (alternative 3), and increased development within the park (alternative 4).

The responsible official for a decision on the proposed action is the Regional Director, Western Region, National Park Service.

Dated: February 28, 1995.

Stanley T. Albright,

Regional Director, Western Region.
