**SUPPLEMENTARY INFORMATION:** Under the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA) pesticides must be tested for a variety of health effects. Specific data requirements are codified in 40 CFR part 158. Guidelines for the conduct of such studies have been developed by the Office of Pesticide Programs and are made available through the National Technical Information service (NTIS). The Pesticide Assessment guidelines, Subdivision F, describe protocols for performing toxicology and related tests to support registration of pesticides under the Federal Food, Drug, and Cosmetic Act and the Federal Insecticide, Fungicide, and Rodenticide Act.

Subdivision F was proposed for public comment in 1978 and published in October 1982. At that time the Agency published criteria for performing a dermal absorption study on a pesticide and reserved a line item, section 85-3, for a guideline on Dermal Absorption Studies of Pesticides. The Agency had available a protocol for dermal absorption studies but did not consider it ready for publication. Following 9 years of experience with studies on the dermal absorption of pesticides, a proposed guideline for Dermal Absorption Studies of Pesticides was made available for public comment by publication in the **Federal Register** of March 13, 1991 and a revised proposed guideline in the **Federal Register** of October 21, 1993. The revised proposed guideline was presented to the FIFRA Scientific Advisory Panel on December 15, 1993 at a public meeting. This final

guideline for Dermal Absorption studies of Pesticides incorporates comments of the public and the FIFRA Scientific Advisory Panel. It is specifically designed to assist in the risk assessment of pesticide exposure by the dermal route, following the determination of a significant toxic effect in toxicology studies performed by the oral or inhalation route.
