ACTION: Notice of proposed information collection requests.

SUMMARY: The Director, Information Resources Group, invites comments on proposed information collection requests as required by the Paperwork Reduction Act of 1980.

SUPPLEMENTARY INFORMATION: Section 3517 of the Paperwork Reduction Act of

1980 (44 U.S.C. Chapter 3517) requires that the Director of OMB provide interested Federal agencies and persons an early opportunity to comment on information collection requests. OMB may amend or waive the requirement for public consultation to the extent that public participation in the approval process would defeat the purpose of the information collection, violate State or Federal law, or substantially interfere with any agency's ability to perform its statutory obligations.

Abstract: This survey of 1,000 public elementary, middle, and secondary schools was requested by the U.S. Department of Agriculture. The survey requests information on the way schools provide nutrition education to students, the topics covered in nutrition education to students, the topics covered in nutrition education, training or education of school nutrition coordinator, materials and resources used in the instruction of nutrition education, and the perceived importance of nutrition education. With the information from the survey, the U.S. Department of Agriculture can identify any gaps and determine what additional efforts might be needed.

Additional Information: Clearance for this information collection is

DEPARTMENT OF ENERGY

Availability of the Tritium Supply and Recycling Draft Programmatic Environmental Impact Statement

AGENCY: Department of Energy.

ACTION: Notice of Availability and Public Hearings.

SUMMARY: The Department of Energy (DOE) announces the availability of the Tritium Supply and Recycling Draft Programmatic Environmental Impact Statement (PEIS), and the dates and locations for public hearings to receive comments on the Draft PEIS. The purpose of the Tritium Supply and Recycling PEIS is to evaluate alternatives for an assured, long-term supply of tritium, a radioactive gas which is a necessary component of every warhead in the Nation's nuclear weapons stockpile.

ADDRESSES AND FURTHER INFORMATION: A copy of the Draft PEIS and/or its Executive Summary may be obtained upon request by calling 1-800-776-2765, or by mail to: Office of Reconfiguration, DP-25, U.S. Department of Energy, P.O. Box 3417, Alexandria, Virginia 22302.

Specific information regarding the public hearings, including registration information, can also be obtained by calling the above toll free number, writing to the address above, or electronically via computer as follows: Federal Information Exchange Bulletin Board, InterNet Address: FEDIX.FIECOM, Modem Toll-Free: 1-800-783-3349, DC Metro Modem: 301-258-0953.

SUPPLEMENTARY INFORMATION: Section 3145 of the National Defense Authorization Act for Fiscal Year 1994, Public Law 103-160, requires the Department of Energy to issue a Programmatic Environmental Impact Statement (PEIS) assessing the Department's capacity to produce tritium not later than March 1, 1995. In accordance with that law, the Tritium Supply and Recycling Draft PEIS was completed and distributed to Congress on March 1, 1995. That same Draft PEIS has also been distributed to individuals and organizations on the program's mailing list. Additional copies of the Draft PEIS are available to any other

interested persons and can be requested as described above.

The Draft PEIS evaluates siting and technology alternatives related to tritium supply and recycling. Four technologies for tritium supply are assessed in the PEIS: Heavy Water Reactor, Modular High-Temperature Gas-Cooled Reactor, Advanced Light Water Reactor, and Accelerator Production of Tritium. Five sites for new tritium supply facilities and tritium recycling facilities are assessed: the Idaho National Engineering Laboratory (Idaho Falls, Idaho); the Nevada Test Site (Las Vegas, Nevada); the Pantex Plant (Amarillo, Texas); the Savannah River Site (Aiken, South Carolina); and the Oak Ridge Reservation (Oak Ridge, Tennessee). Two options for tritium recycling are evaluated: upgrade of existing tritium recycling facilities at the Savannah River Site, or collocation of a new tritium recycling facility with the tritium supply facility at one of the other sites.

Two of the three reactor technologies (Advanced Light Water Reactor and Modular High Temperature Gas-Cooled Reactor) are also evaluated in the Draft PEIS as "triple play" reactors which are capable of "burning" plutonium in addition to producing tritium and generating electricity. Additionally, the Draft PEIS includes an assessment of the generic environmental impacts of producing tritium in an existing commercial reactor, either as a contingency option in the event of a national emergency, or if the Department should choose to purchase such a reactor and convert it to defense purposes. The Department does not have a preferred alternative at this time for tritium supply and recycling sites, or for a tritium supply technology. The Final PEIS will include any preferred alternative. However, the Department may choose to identify a preferred alternative prior to issuing the Final PEIS.

Six public hearings to receive comments on the Draft PEIS will be held as follows:

Office of Civilian Radioactive Waste Management; Waste Acceptance Issues

AGENCY: Office of Civilian Radioactive Waste Management, Department of Energy.

ACTION: Notice of Availability of the Response Summary Report for the Department of Energy's Notice of Inquiry on Waste Acceptance Issues.

SUMMARY: The Department of Energy published a Notice of Inquiry on May 25, 1994, to elicit the views of affected parties on: (1) The Department's preliminary view that it does not have a statutory obligation to accept spent nuclear fuel in 1998 in the absence of an operational repository or a suitable storage facility constructed under the Nuclear Waste Policy Act of 1982, as amended; (2) the need for an interim, away-from-reactor storage facility prior to repository operations; and (3) options for offsetting, through the use of the Nuclear Waste Fund, a portion of the financial burden that may be incurred by utilities in continuing to store spent nuclear fuel at reactor sites beyond 1998 (59 FR 27007). The Notice of Inquiry implemented the Secretary's initiative to invite the views of interested parties and to advance the consensus-building process on resolving these important issues.

The Notice of Inquiry requested written comments on or before September 22, 1994. In response to a

request from six organizations, the Department published a Notice on October 18, 1994, announcing the reopening of this comment period until December 19, 1994 (59 FR 52524). The Department received more than 1,100 comment letters in response to the Notice of Inquiry.

The purpose of this Notice is to announce the availability of the *Notice of Inquiry on Waste Acceptance Issues—Response Summary Report* which the Department prepared to present a summary of the comments received in response to the Notice of Inquiry. The Department is currently reviewing the comments for the purpose of preparing its response to the issues set forth in the Notice of Inquiry.
