Opportunity For a License: Live, Attenuated Bovine Parainfluenza Virus Type 3 (BPIV-3) for Use as a Vaccine to Protect Infants and Children Against Disease(s) Caused by Human Parainfluenza Virus Type 3 (HPIV-3)

AGENCY: National Institutes of Health, Public Health Service, DHHS.

ACTION: Notice.

SUMMARY: The National Institutes of Health (NIH), Department of Health and Human Services (DHHS), seeks licensee(s) who can effectively pursue the clinical and commercial development of a live, attenuated BPIV-3 vaccine. Several common childhood acute respiratory illnesses, including croup, pneumonia and bronchiolitis, are caused by HPIV-3 viral infection. Briefly, the National Institute of Allergy and Infectious Diseases (NIAID) has supported the clinical research development of this experimental

vaccine in a series of phase I trials and has evidence that this candidate live virus could be used as a safe and immunogenic pediatric vaccine against HPIV-3. The NIAID is interested in having these efforts utilized for the public good, as mandated by the Federal Technology Transfer Act (FTTA) of 1986, by transferring certain unpatented biological materials to a company. For consideration, prospective licensee(s) should be capable of further developing and eventually commercializing a live attenuated BPIV-3 vaccine. Furthermore, the prospective industrial partner should have: An aggressive clinical development plan for BPIV-3; access to suitably equipped manufacturing facilities for large-scale production of the candidate vaccine; relevant experience in obtaining regulatory approval for other vaccines. NIAID scientists would provide the relevant BPIV-3 viral strains as well as supply information and data from the completed phase I clinical studies. This information is available for confidential evaluation to interested parties following the acceptance of standard confidentiality terms. The deadline for submitting a license application will be 90 days from March 21, 1995.
