

intensive study of existing reports and data on the subject, and open-ended inquiry to experienced providers of undergraduate education. Phase II of the project will rely upon a preliminary summary of the findings from Phase I prepared by NSF staff that will be presented for comment and elaboration to a large number of persons experienced in undergraduate education, particularly to those faculty and administrators attending key professional society meetings. In Phase III, the NSF will seek to publicize and encourage implementation of those practices that will achieve improved science and engineering literacy; a technically capable workforce; well-prepared teachers, scientists and engineers; and greater participation in SMET careers by women and minorities.
