Notice of Intent to Consider Amending the Walker Resource Management Plan

AGENCY: Bureau of Land Management, Interior.

ACTION: Notice of Intent to consider amending the Walker Resource Management Plan, prepare an environmental assessment and invite public participation.

SUMMARY: The Carson City District of the Bureau of Land Management is considering amending the Walker Resource Management Plan to address management of pinyon-juniper woodlands and off-highway vehicles (OHVs). The proposed amendment would cover public lands in the Pine Nut Mountains of Carson City, and Lyon and Douglas Counties, Nevada.

DATES AND ADDRESSES: Written comments on the proposed amendment and environmental assessment are welcomed until April 28, 1995. They should be sent to David Loomis, U.S. Bureau of Land Management, 1535 Hot Springs Road, Carson City, NV 89706. Please call Mr. Loomis at 702 885-6149 for further information.

SUPPLEMENTARY INFORMATION: The public is invited to participate in the identification of issues related to the management of pinyon-juniper woodlands and the management of off-highway vehicles in the Pine Nut Mountains of western Nevada. This plan amendment would address the expansion of pinyon-juniper woodlands and the rapid increase in population growth and OHV recreation in the Pine Nut Mountains.

The current patterns of vegetation in the Pine Nut Mountains have resulted from logging in the late 1800s, followed by a period of historic grazing by livestock. Then a long period of fire suppression limited the natural role of wildfires in the Pine Nut Mountains ecosystem. This reduced natural diversity in vegetation patterns and favored the spread of pinyon-juniper woodland. Fire suppression activities have contributed to an accumulation of fire hazard fuels that have caused a trend towards large, expensive, and destructive wildfires such as the Holbrook Junction fire of 1994.

Some of the pinyon-juniper management methods to be considered

in the proposed plan amendment include removal of trees by opening wood cutting areas and changes in fire management strategies, including prescribed fires.

Another issue to be addressed is the management of off-highway vehicle (OHV) recreation in the Pine Nut Mountains. The region has experienced a rapid population growth and increase in OHV use. The current designations are over ten years old and have been difficult to manage. Conflicts with property owners, wildlife and watershed protection have increased.

Planning documents and other pertinent materials may be examined at the Bureau of Land Management office in Carson City between 7:30 a.m. and 5:00 p.m. Monday through Friday.

Dated this 10th day of March, 1995.

John Singlaub,

District Manager, Carson City District.
