

in the proposed plan amendment include removal of trees by opening wood cutting areas and changes in fire management strategies, including prescribed fires.

Another issue to be addressed is the management of off-highway vehicle (OHV) recreation in the Pine Nut Mountains. The region has experienced a rapid population growth and increase in OHV use. The current designations are over ten years old and have been difficult to manage. Conflicts with property owners, wildlife and watershed protection have increased.

Planning documents and other pertinent materials may be examined at the Bureau of Land Management office in Carson City between 7:30 a.m. and 5:00 p.m. Monday through Friday.

Dated this 10th day of March, 1995.

John Singlaub,

District Manager, Carson City District.

Bureau of Reclamation

[INT-FES-95-8]

Operation of Glen Canyon Dam, Colorado River Storage Project, Arizona

AGENCY: Bureau of Reclamation, Interior.

ACTION: Notice of availability of the final environmental impact statement.

SUMMARY: In response to a July 27, 1989, directive from the Secretary of the Interior and pursuant to the National Environmental Policy Act of 1969, as amended, and in accordance with the Grand Canyon Protection Act of 1992, the Bureau of Reclamation (Reclamation) has prepared a final environmental impact statement (FEIS) on the operation of Glen Canyon Dam, Colorado River Storage Project in Arizona. The FEIS evaluates nine alternatives, including no action, and analyzes their impacts on downstream environmental and cultural resources and Native American interests in Glen and Grand Canyons.

ADDRESSES: Copies of the FEIS may be obtained from Mr. Gordon S. Lind, Colorado River Studies Office, Bureau of Reclamation, Attention: UC-1500, 125 South State Street, Room 6107, Salt Lake City UT 84138-1102; telephone: (801) 524-5479.

Copies of the FEIS are available for inspection at the address above and also at the following locations:

- Office of the Commissioner, Bureau of Reclamation, Room 7612, 1849 C Street, NW, Washington DC 20240

FOR FURTHER INFORMATION CONTACT: Mr.
Gordon S. Lind, Colorado River Studies
Office, Bureau of Reclamation, 125
South State Street, Room 6107, Salt
Lake City UT 84138-1102; telephone:
(801) 524-5479.

SUPPLEMENTARY INFORMATION: The
Secretary of the Interior called for a
reevaluation of dam operations to
determine specific options that could be
implemented, consistent with law, to
minimize adverse impacts on the
downstream environmental and cultural
resources and Native American interests
in Glen and Grand Canyons.

In accordance with the National
Environmental Policy Act and the

Grand Canyon Protection Act of 1992,
Reclamation has prepared the FEIS in
cooperation with other Interior
agencies—Bureau of Indian Affairs, U.S.
Fish and Wildlife Service (FWS), and
National Park Service. Other
cooperating agencies are the Department
of Energy's Western Area Power
Administration, Arizona Game and Fish
Department, Hopi Tribe, Hualapai Tribe,
Navajo Nation, San Juan Southern
Paiute Tribe, Southern Paiute
Consortium, and Zuni Pueblo.

The FEIS presents analyses of the
impacts of nine alternatives for
operating Glen Canyon Dam. Three
alternatives would provide steady flows
and six, including no action, would
provide various levels of fluctuating
flows. Additional measures have been
combined with the alternative
operations, where appropriate, either to
mitigate adverse impacts of the
alternative or to enhance resources. The
preferred alternative is the Modified
Low Fluctuating Flow Alternative.

As the result of comments on both the
draft EIS (DEIS) and draft biological
opinion, discussions with FWS, and
with the broad support of the
cooperating agencies, the preferred
alternative described in the DEIS was
modified in the FEIS. This modification
includes increasing the maximum flow
from 20,000 to 25,000 cubic feet per
second (cfs) and increasing the up ramp
rate from 2,500 to 4,000 cfs per hour.
The endangered fish research flows
described in the DEIS were moved from
the preferred alternative to a
scientifically based position within the
Adaptive Management Program. This
modification was made because
Reclamation believes that the potential
effects of steady flows should be further
studied before implementation to
evaluate uncertainties concerning the
interactions between native and non-
native fish.

In addition, Reclamation will request,
through the Federal appropriations
process, accelerated implementation of
selective withdrawal at Glen Canyon
Dam since temperature modification has
been determined to be the most critical
factor affecting the recovery of
endangered fish in Glen and Grand
Canyons.

Compliance.*
