BILLING CODE 6210-01-F

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[CRADA 95-002]

National Institute for Occupational Safety and Health; Cooperative Research and Development Agreement

AGENCY: Centers for Disease Control and Prevention (CDC), Public Health Service, HHS.

ACTION: Notice.

SUMMARY: The Centers for Disease Control and Prevention (CDC), National Institute for Occupational Safety and Health (NIOSH), announces the opportunity for potential collaborators to enter into a Cooperative Research and Development Agreement (CRADA) to develop an inexpensive aerosol generator to produce a solid sodium chloride aerosol with a CMD between 0.06 and 0.11 μm and a geometric standard deviation of 1.80 as measured by a differential mobility particle sizer.

It is anticipated that all inventions which may arise from this CRADA will be jointly owned. The collaborator(s) with whom the CRADA is made will

have an option to negotiate an exclusive or nonexclusive royalty-bearing license. The CRADA will be executed for a 2-year period with the possibility of renewal for another 2-year period.

Because CRADAs are designed to facilitate the development of scientific and technological knowledge into useful, marketable products, a great deal of freedom is given to Federal agencies in implementing collaborative research. The CDC may accept staff, facilities, equipment, supplies, and money from the other participants in a CRADA; CDC may provide staff, facilities, equipment, and supplies to the project. There is a single restriction in this exchange: CDC MAY NOT PROVIDE FUNDS to the other participants in a CRADA. This opportunity is available until 30 days after publication of this notice.

Responses may be provided a longer period of time to furnish additional information if CDC finds this necessary.

SUPPLEMENTARY INFORMATION: The inexpensive aerosol generator to produce solid sodium chloride aerosol of the desired size and size distribution will be used in determining filter penetration in accordance with NIOSH-proposed new respirator regulations 42 CFR Part 84. The generation system needs to be able to reproducibly produce sodium chloride aerosol of known size (0.06-0.11 μm CMD) and with a standard deviation of ≤ 1.80 . The aerosol's concentration needs to be >10 mg/m^3 and can be as high as 200 mg/m^3 . The collaborator(s) and NIOSH will jointly perform the research aimed at development of a commercially inexpensive system to achieve instrument ruggedness and lowest possible cost per unit system. NIOSH will provide technical expertise, consultation and guidance, system specifications, verification of system integrity, and product evaluation and testing. Since this CRADA involves the

bringing together of diverse technologies, a consortium of collaborators will be considered. Technology derived under this CRADA will not be used for standards setting.

Applicants will be judged according to the following criteria:

1. Adequacy and technical capabilities to develop the desired technologies and product;
2. Ability to develop, produce, market, and support commercial aerosol generation systems;
3. Evidence of technical credibility; and
4. Ability to complete the CRADA in a timely fashion.

This CRADA is proposed and implemented under the 1986 Federal Technology Transfer Act: Pub. L. 99-502.

The responses must be made to: Theodore F. Schoenborn, Technology Transfer Coordinator, National Institute for Occupational Safety and Health, CDC, 4676 Columbia Parkway, Mailstop R2, Cincinnati, Ohio 45226.

Dated: March 17, 1995.

Director, National Institute for Occupational Safety and Health, Centers for Disease Control and Prevention (CDC).
