High-Tenacity Rayon Filament Yarn From Germany; Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of final results of antidumping duty administrative review.

SUMMARY: On June 22, 1994, the Department of Commerce published the preliminary results of review of the antidumping duty order on rayon filament yarn from Germany. The review covers the subsidiaries of one producer/importer, Akzo Faser N.V. Its subsidiaries are Akzo Fibers, Inc., in the United States, and Akzo Faser A.G., in Germany.

We gave interested parties an opportunity to comment on the preliminary results. Based on our

analysis of the comments received, and the correction of clerical errors, we have changed the final results from those presented in the preliminary results of review.

EFFECTIVE DATE: March 28, 1995.

FOR FURTHER INFORMATION CONTACT: Matthew Blaskovich or Zev Primor, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, NW., Washington, DC 20230; telephone (202) 482-5831/4114.

SUPPLEMENTARY INFORMATION:

Background

On June 29, 1993, Akzo Faser N.V. and its subsidiaries (Akzo) requested that the Department of Commerce (the Department) conduct an administrative review of the antidumping duty order on high-tenacity rayon filament yarn from Germany. We initiated the review, which covers the period February 20, 1992 through May 31, 1993, on July 21, 1993 (58 FR 39007). On June 22, 1994, the Department published the preliminary results of the administrative review (59 FR 32181). The Department has now completed the administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of the Review

The product covered by this administrative review is high-tenacity rayon filament yarn from Germany. High-tenacity rayon filament yarn is a multifilament single yarn of viscose rayon with a twist of five turns or more per meter, having a denier of 1100 or greater, and a tenacity greater than 35 centinewtons per tex. During the review period, such merchandise was classifiable under Harmonized Tariff Schedule (HTS) item number 5403.10.30.40. The HTS item number is provided for convenience and Customs purposes. The written description remains dispositive as to the scope of the product coverage.

Analysis of Comments Received

We gave interested parties an opportunity to comment on the preliminary results. We received comments from North American Rayon Corporation (the petitioner) and the respondent on July 22, 1994. We received rebuttal comments from the petitioner and the respondent on July 29, 1994. At the request of the respondent, we held a public hearing on August 5, 1994.
