Preliminary Identification of Environmental Issues

The following issues have been tentatively identified for analysis in the EIS. The list is presented to facilitate comment on the scope of the EIS. It is not intended to be all-inclusive or to predetermine the potential impacts of any of the alternatives:

- Effects on the public and on-site workers from releases of radiological and nonradiological materials during normal operations and reasonably foreseeable accidents.
- Effects on air and water quality from normal operations and accidents.
- Cumulative effects, including impacts from other past, present, and reasonably foreseeable actions at the site.
- Effects on endangered species, archaeological/historical sites, floodplains, and wetlands.
- Effects on future decommissioning actions.
- Effects from transportation and from transportation accidents.
- Socioeconomic impacts on surrounding communities.
- Disproportionately high and adverse effects on low-income and

minority populations (environmental justice).

- Unavoidable adverse environmental effects.
- Short-term uses of the environment versus long-term productivity.
- Potential irretrievable and irreversible commitment of resources.
