

a pipeline across the ridge to the Pony Creek basin, discharging into a natural channel flowing into Upper Pony Creek Reservoir. As needed, water stored in Upper Pony Creek Reservoir would be released into lower Pony Creek where it is withdrawn and treated at the water treatment plant.

The alternatives to be considered in the DEIS area:

- the proposed project
- development of other water supplies to meet the project objectives
- no action.

The scoping process will commence in March 1995 with the issuance of a scoping letter. Federal, state and local agencies, Indian tribes, and interested organizations and individuals will be asked to comment on the significant issues relating to the potential effects of the alternatives. Potentially significant issues to be addressed in the DEIS include: effects of the project on wetlands, wildlife habitat and populations, and fisheries.

A formal scoping meeting has not been scheduled. The applicant has scheduled a public meeting to be held at 7:00 pm, on April 5, 1995, at the North Bend Public Library, North Bend, Oregon. the purpose of the public meeting is to provide more information on the project and the scope of studies to be accomplished for this DEIS, to assist interested parties in developing their scoping comments.

The DEIS is scheduled to be made available to the public in late 1995.

Kenneth L. Denton,

Army Federal Register Liaison Officer.

BILLING CODE 3710-AR-M

Corps of Engineers

Finding of No Significant Impact (FNSI) for a Draft Environmental Impact Statement (DEIS) for the Lower Santa Cruz River Flood Control Study, Pinal County, AZ

AGENCY: Corps of Engineers, Los Angeles District, DOD.

ACTION: Finding of no significant impact.

SUMMARY: The **Federal Register**, Volume 55, No. 105, dated May 31, 1990, contained a Notice of Intent to Prepare a Draft Environmental Impact Statement for the Lower Santa Cruz River Flood Control Study, Pinal County, AZ. No implementable flood control plan was developed, and the study has been terminated. No Draft Environmental Impact Statement was prepared.

ADDRESSES: U.S. Army Corps of Engineers, Los Angeles District, P.O. Box 2711, Los Angeles, CA 90053-2325.

FOR FURTHER INFORMATION CONTACT:

Mr. William R. Burton, 894-4352.

BILLING CODE 3710-KF-M

Corps of Engineers

Intent To Prepare a Draft Environmental Impact Statement (DEIS) for the Proposed Surface Coal Mining Operation in Saline County, Illinois

AGENCY: U.S. Army Corps of Engineers, Louisville District, DOD.

ACTION: Notice of Intent.

SUMMARY: The proposed project involves the surface mining of coal from 1,537 acres of a 1,935 acre site located 1 to 3 miles west of Harrisburg in Saline County, Illinois. The proposed surface mine includes approximately 400 acres of jurisdictional wetlands. The major impacts would be the permanent relocation of Bankston Fork, construction of a haul road to the coal extraction areas using a bridge over Bankston Fork, construction of 12,500 feet of levee along Bankston Fork to provide temporary flood protection for the mining site, and surface mining coal from 1,537 acres.

ADDRESSES: U.S. Army Corps of Engineers, Louisville District, P.O. Box 59, Louisville, Kentucky 40201-0059.

FOR FURTHER INFORMATION CONTACT:

Mr. Michael Turner, (502) 582-6015.

SUPPLEMENTARY INFORMATION: The wetland areas to be impacted consist of approximately 200 acres of palustrine forested wetlands with the remainder being open water, scrub/shrub, and emergent wetlands. The relocation of Bankston Fork would be accomplished by excavating 291,000 cubic yards of material. This material would be utilized in constructing a temporary flood control levee. The new stream channel would be 7,450 feet long, 450 feet longer than the existing stream channel. After relocating the stream and construction of a bridge, mining would consist of removing the overburden in 150 to 200 foot wide open pits of varying lengths using a large dragline. Mining would progress through the area protected by the levee over a period of 7 years commencing in 1996.

Proposed mitigation for the loss of wetlands will consist of the creation of nearly 700 acres of wetlands on-site and

the restoration of same on another 200+ acres both on- and off-site. Open water, forested, scrub/shrub, and emergent wetlands are planned.

The Corps of Engineers will initiate a scoping process for the purpose of determining the range of issues to be addressed in the Draft Environmental Impact Statement (DEIS). A public scoping meeting is scheduled for Wednesday, April 26, 1995, beginning at 7:00 p.m., in the Pruett-Patton Building which is located on Church Street next to and behind the Mitchell-Carnegie Public Library in Harrisburg, Illinois.

A brief presentation will precede the request for public comment. Corps representatives will be available at this meeting to receive comments from the public regarding issues which should be addressed in the preparation of the DEIS. It is important that Federal, state, and local agencies and interested individuals take this opportunity to identify environmental concerns. In the interest of available time, each speaker will be asked to limit their oral comments to ten minutes.

Agencies and the public are also invited and encouraged to provide written comments in addition to, or in lieu of, oral comments at the public meeting. To be most helpful, scoping comments should clearly describe specific issues or topics which the individual or agency believes the DEIS should address. Written statements should be mailed to the above address not later than May 8, 1995.

Kenneth L. Denton,

Army Federal Register Liaison Officer.
