

residential customers. The LECs' comments on costs should include the categories of costs (e.g., switching, administration, etc.) that would be incurred to provide international blocking capability to all residential customers. They should also show the extent to which those costs would be reduced by not providing blocking in areas in which it would not be technically feasible and economically reasonable to do so. For each instance in which a LEC claims that it would not be technically feasible and economically reasonable to provide residential blocking, its comments should specify the type of equipment, the number of end offices affected, the nature of the problem (i.e., inadequate switch memory) and the percentage of residential access lines that would not receive international blocking. Also, the LEC should provide a timeable indicating when, under its current investment plans, it would become technically feasible and economically reasonable to offer international blocking to residential customers from those end offices.

Interested parties may file comments on these issues no later than April 24, 1995. Replies should be filed by May 8, 1995.

An original and four copies of all comments and replies must be filed in accordance with Section 1.51(c) of the Commission's Rules, 47 C.F.R. § 1.51(c). In addition, one copy of each pleading must be filed with International Transcription Services (ITS), the Commission's duplicating contractor, at its office at 2100 M Street, N.W., Suite 140, Washington, D.C. 20037 and one copy with the Chief, Tariff Division, Room 518, 1919 M Street, N.W., Washington, D.C. 20554.
