

should immediately contact the above office. Documents also will be available for public inspection, by appointment, during normal business hours (8:00 a.m. to 4:30 p.m.) at the above address.

SUPPLEMENTARY INFORMATION: Under section 9 of the Act and its implementing regulations, "taking" of the coastal California gnatcatcher, a threatened species, is prohibited. Under limited circumstances, however, the Service may issue permits to take threatened wildlife species if such taking is incidental to, and not the purpose of, otherwise lawful activities. Regulations governing permits for threatened species are in 50 CFR 17.32.

The applicants desire a permit to incidentally take 2 pairs of California gnatcatchers and approximately 17 acres of coastal sage scrub, disturbed coastal sage scrub, coastal bluff scrub, and disturbed coastal bluff scrub within a 261-acre project area. The applicants also desire unlisted species agreements for the coastal cactus wren (*Campylorhynchus brunneicapillus couesi*) and 6 sensitive plant species: aphanisma (*Aphanisma blitoides*), ocean locoweed (*Astragalus trichopodus* var. *trichopodus*), south coast saltscale (*Atriplex pacifica*), Catalina mariposa lily (*Calochortus catalinae*), seaside calandrinia (*Calandrinia maritima*), and bright green dudleya (*Dudleya virens*). Should these species be listed as threatened or endangered, the applicants will submit the HCP and IA in support of a permit amendment.

The proposed action includes 79 single family homes and an 18-hole public golf course. Measures to minimize and mitigate impacts include phased grading, revegetation, conservation easements, a coastal bluff/open-space preserve, removal of non-native plants, cowbird and predator trapping, and perpetual funding for habitat management.

The EA considers the environmental effects of the proposed action and 2 alternatives: a reduced project/reduced HCP alternative, and a no action/no take alternative. The no action and reduced project alternatives were not selected because neither provide the substantial long-term conservation benefits to the gnatcatcher and other candidate and sensitive species that would be provided under the proposed action.

The proposed action would result in a net gain of 61.4 acres of coastal sage scrub (29.7 acres on-site, 31.7 acres off-site) and 2.9 acres of coastal bluff (on-site) in dedicated preserves. Under the proposed action, the enhancement and permanent protection of coastal sage scrub habitat would provide substantial

long-term conservation benefits to the gnatcatcher. The proposed action also would provide substantial permanent conservation benefits to the cactus wren and 6 sensitive plant species, 3 of which are Federal category 2 candidates for listing.

Dated: April 5, 1995.

David L. McMullen,

Deputy Regional Director, Region 1, Portland, Oregon.

Fish and Wildlife Service

Endangered and Threatened Species Permits

AGENCY: Fish and Wildlife, Interior.

ACTION: Notice.

SUMMARY: Notice is hereby given that Region 1 of the U.S. Fish and Wildlife Service has issued the following permits, between October 1, 1994 and March 31, 1995, for incidental take of threatened or endangered species from applications duly received according to section 10 of the Endangered Species Act of 1973, as amended (Act). Each permit listed as issued was granted only after it was determined to be applied for in good faith, and that it was consistent with the Act and applicable regulations.

Name	Permit No.	Issuance date
Nye County	776604	2/13/95
Weyerhaeuser Company	796822	2/14/95
Coast Range Conifers	791930	3/22/95
John Laing Properties, Inc.	788945	3/22/95

FOR FURTHER INFORMATION CONTACT: Chief, Division of Consultation and Conservation Planning, U.S. Fish and Wildlife Service, 911 NE 11th Avenue, Portland, Oregon 97232-4181 (503-231-6241). Please refer to the permit number listed above when requesting information.

Dated: April 5, 1995.

David L. McMullen,

Deputy Regional Director, Region 1, Portland, Oregon.
