RIN No. 2070-AC69 and 2070-AC82

**Amendments to the Worker Protection Standard Requirements for Crop Advisors and Training Requirements for Agricultural Workers and Pesticide Handlers; Notification to Secretary of Agriculture**

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notification to Secretary of Agriculture.

**SUMMARY:** Notice is given that the Administrator of EPA has forwarded to the Secretary of Agriculture a final rule amending the crop advisor provisions of the Worker Protection Standard and a final rule amending the training requirements for workers and pesticide handlers. These final rules are being issued under the Federal Insecticide, Rodenticide, and Fungicide Act (FIFRA).

**FOR FURTHER INFORMATION CONTACT:** Donald Eckerman, Certification and Training, Occupational Safety Branch (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm 1101, CM #2, 1921 Jefferson Davis Highway, Arlington, VA., (703) 305-7371.

**SUPPLEMENTARY INFORMATION:** Pursuant to Section 25(a)(2)(B) of FIFRA, the Administrator shall provide the Secretary of Agriculture with a copy of any final rule before publication in the Federal Register. If the Secretary comments in writing to the Administrator regarding the final rule, the Administrator shall issue for publication in the Federal Register, with the final rule, the comments of the Secretary of Agriculture, if requested by the Secretary, and the response of the Administrator concerning the Secretary's comments. The Administrator has forwarded to the Secretary of Agriculture a copy of the final rule amending the requirements for training employees and a final rule amending the requirements for crop advisors.

The Administrator has also provided a copy of these final rules to the Committee on Agriculture of the House of Representatives, and the Committee on Agriculture and Forestry of the Senate.

## List of Subjects in 40 CFR Part 170

Administrative Practice and Procedures, Occupational Safety and Health, Pesticides and Pests.

Dated: April 5, 1995.

Daniel M. Barolo,  
Director, Office of Pesticide Programs.

[FR Doc. 95-9167 Filed 4-11-95; 8:45 am]

BILLING CODE 6560-50-F

[PP 2E4051/P608; FRL-4943-1]

RIN 2070-AC18

**Difenoconazole; Pesticide Tolerances**

AGENCY: Environmental Protection Agency (EPA).

ACTION: Proposed rule.

**SUMMARY:** EPA proposes to establish import tolerances for residues of the fungicide difenoconazole in or on the raw agricultural commodities barley grain, rye grain, and wheat grain at 0.1 part per million; fat, meat, and meat byproducts of cattle, goats, hogs, horses, poultry, and sheep and eggs at 0.05 ppm; and milk at 0.01 ppm. Ciba-Geigy Corp. requested the proposed regulation to establish a maximum permissible level of the fungicide in or on the commodities.

**DATES:** Comments, identified by the document control number, [PP 2E4051/P608], must be received on or before May 12, 1995.

**ADDRESSES:** By mail, submit written comments to: Public Response and Program Resources Branch, Field Operations Division (7506C), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. In person, bring comments to: Rm. 1132, CM #2, 1921 Jefferson Davis Highway, Arlington, VA 22202. Information submitted as a comment concerning this notice may be claimed confidential by marking any part or all of that information as "Confidential Business Information" (CBI).

Information so marked will not be disclosed except in accordance with procedures set forth in 40 CFR part 2. A copy of the comment that does not contain CBI must be submitted for inclusion in the public record. Information not marked confidential may be disclosed publicly by EPA without prior notice. All written comments will be available for public inspection in Rm. 1132 at the address given above, from 8 a.m. to 4 p.m.,

Monday through Friday, excluding legal holidays.

**FOR FURTHER INFORMATION CONTACT:** By mail: Cynthia Giles-Parker, Product Manager (PM) 22, Registration Division, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Office location and telephone number: Rm. 229, CM #2, 1921 Jefferson Davis Hwy., Arlington, VA 22202, (703)-305-5540; e-mail: giles-parker.cynthia@epamail.epa.gov.

**SUPPLEMENTARY INFORMATION:** EPA is proposing to establish import tolerances for residues of the fungicide difenoconazole, [(2S,4R)/(2R,4S)]/[(2R,4R/2S,4S)] 1-(2-[4-(4-chlorophenoxy)-2-chlorophenyl]-4-methyl-1,3-dioxolan-2-yl-methyl)-1H-1,2,4-triazole, in or on the raw agricultural commodities (RACs) barley grain, rye grain, and wheat grain at 0.1 ppm; fat, meat, and meat byproducts (mby) of cattle, goats, hogs, horses, poultry, and sheep and eggs at 0.05 ppm; and milk at 0.01 ppm. The proposed regulation to establish a maximum permissible level of the fungicide in or on this commodity was requested in a pesticide petition (PP 2E4051) submitted by Ciba-Geigy Corp., P.O. Box 18300, Greensboro, NC 27419-8300, that requested that the Administrator, pursuant to section 408(e) of the Federal Food, Drug, and Cosmetic Act (FFDCA), 21 U.S.C. 346a(e), amend 40 CFR 180.475 by establishing import tolerances for residues of the fungicide.

The scientific data submitted in the petition and other relevant material have been evaluated. The toxicological data considered in support of the proposed tolerance include:

1. A rat acute oral study with an LD<sub>50</sub> of 1,453 milligrams (mg)/kilogram (kg).
2. A 13-week rat feeding study with a no-observed-effect-level (NOEL) of 20 ppm (1 mg/kg/day).
3. A 13-week mouse feeding study with a NOEL of 20 ppm (3.6 mg/kg/day).
4. A 26-week dog feeding study with a NOEL of 1,000 ppm (3.3 mg/kg/day).
5. A 21-day rabbit dermal study with a NOEL of 10 mg/kg and reduction in body weight gain and food consumption from exposure to doses equal to or greater than 100 mg/kg.
6. A carcinogenicity study in mice with a NOEL of 30 ppm (5 mg/kg/day) and a lowest-effect-level (LEL) of 300 ppm (50 mg/kg/day) owing to reductions in cumulative body weights. There was limited evidence of carcinogenicity based on the occurrence of increased benign and/or malignant liver tumors in males and females. The carcinogenic effects observed are discussed below.
