FEDERAL COMMUNICATIONS COMMISSION

47 CFR Part 61

[CC Docket No. 94-1; FCC 95-132]

Price Cap Performance Review for Local Exchange Carriers

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: On March 30, 1995, the Federal Communications Commission adopted a First Report and Order revising its price cap regulations applicable to local exchange carriers (LECs). The Commission adopted these Rule revisions as a result of a performance review of LEC price cap regulation, which the Commission scheduled when it originally adopted LEC price cap regulation in 1990, to evaluate the price cap system as implemented and LEC performance under that system. The Commission's rule revisions increase value of the productivity offset factor in the price cap formula, provide three options for the productivity offset factor, revise the rules governing sharing obligations, and require a one-time reduction in the LECs' price cap indexes. The Commission also limits the number of cost changes resulting from changes in accounting rules that are eligible for exogenous cost treatment, and extends exogenous cost treatment to cost changes resulting from the sales or swaps of exchanges. In addition, the Commission states its intention to issue a further notice of proposed rulemaking in the near future, to consider adopting

other rule changes on a long-term basis. Finally, the Commission delegates authority to the Common Carrier Bureau to determine appropriate adjustments for LECs to make appropriate adjustments to their price cap indexes, to account for these effects caused by rescheduling their 1995 annual access filings.

EFFECTIVE DATE: May 19, 1995.

SUPPLEMENTARY INFORMATION: This is a summary of the Commission's First Report and Order adopted March 30, 1995, and released April 7, 1995. The full text of this Commission decision is available for inspection and copying during normal business hours in the FCC Public Reference Room (Room 230), 1919 M. St., N.W., Washington, D.C. Regulatory Flexibility Analysis

We have determined that Section 605(b) of the Regulatory Flexibility Act of 1980, 5 U.S.C. § 605(b), does not apply to these rules because they do not have a significant economic impact on a substantial number of small entities. The definition of a "small entity" in Section 3 of the Small Business Act excludes any business that is dominant in its field operation. Local exchange carriers do not qualify as small entities because they have a nationwide monopoly on ubiquitous access to the subscribers in their service area. The Commission also has found all exchange carriers to be dominant in its competitive carrier proceeding. See 85 FCC 2d 1, 23-24 (1980).

To the extent that small telephone companies will be affected by these rules, we hereby certify that these rules will have a significant effect on a substantial number of "small entities."

Summary of Report and Order

In this Order, we adopted revisions to the productivity offset factor, or "X-Factor," of the price cap index formula. In the formula, the X-Factor, which represents the amount by which local exchange carriers have been more productive than the economy as a whole, is subtracted from the Gross National Product Price Index (GNP-PI), a measure of inflation. In general, LEC prices are not permitted to increase more than the rate established by the
