RUS has concluded that the environmental impacts from the proposed project would not be significant and that the proposed action is not a major Federal action significantly affecting the quality of the human environment. Therefore, the preparation of an environmental impact statement is not required.

SUPPLEMENTARY INFORMATION: RUS, in accordance with its environmental policies and procedures, required that Sunflower prepare a Borrower's Environmental Report (BER) reflecting the potential impacts of the proposed facilities. The BER, which includes input from Federal, State and local agencies and the public, has been adopted as RUS' Environmental Assessment for the project in accordance with 7 CFR 1794.61. RUS has concluded that the BER represents an accurate assessment of the environmental impacts of the project. The proposed project should have no impact on cultural resources, floodplains, important farmland and federally listed or proposed for listing threatened or endangered species or their critical habitat. The proposed route may impact wetland areas associated with the crossing of the Arkansas River. Sunflower will avoid placing structures in wetland habitat. RUS has determined that there is no practicable alternative to crossing wetland areas associated with the Arkansas River and the impact to these areas should be minimal.

The proposed 115 kV transmission line would extend from the Fletcher Substation located in Kearny County south along section lines to the Pioneer Substation located in Grant County. The southern portion of the line in Grant County would be located on existing right-of-way. The primary structure type will be wood pole H-frame structures located on a 100-foot wide right-of-way.

Alternatives considered to the project included no action, demand side management, local generation, the addition of capacitor banks at the Pioneer Substation, closing the Cimarron Interconnection with WestPlains Energy and alternative routes. RUS has considered these alternatives and concluded that the project as proposed meets the needs of Sunflower to provide adequate service

to its member system, Pioneer Electric Cooperative, Inc.

Copies of the BER and FONSI are available for review at RUS at the address provided herein; or can be reviewed at or obtained from the offices of Sunflower, 301 West 13th Street, Hays, Kansas 67601, telephone (913) 628-2845, during normal business hours.
