Emergency Exemptions

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: EPA has granted specific exemptions for the control of various pests to the 11 States listed below and to the United States Department of the Interior, Fish and Wildlife Service. There were also six crisis exemptions initiated by various States. These exemptions, issued during the months of January and February 1995, are subject to application and timing restrictions and reporting requirements designed to protect the environment to the maximum extent possible. EPA has denied a specific exemption request from the Louisiana Department of Agriculture and Forestry. Information on these restrictions is available from the contact persons in EPA listed below.

DATES: See each specific and crisis exemption for its effective date.

FOR FURTHER INFORMATION CONTACT: See each emergency exemption for the name of the contact person. The following information applies to all contact persons: By mail: Registration Division (7505W), Office of Pesticide Programs, Environmental Protection Agency, 401 M St., SW., Washington, DC 20460. Crisis exemptions were initiated by the:

1. Alabama Department of Agriculture and Industries on January 25, 1995, for the use of hydrogen cyanamide on peaches to stimulate uniform bud-break. This program has ended. (Rick Keigwin)

2. California Department of Pesticide Regulation on February 21, 1995, for the use of fenamiphos on broccoli and cauliflower to control nematodes. This program is expected to last until February 20, 1996. (Libby Pemberton)

3. Georgia Department of Agriculture on January 19, 1995, for the use of hydrogen cyanamide on peaches to stimulate uniform bud-break. This program has ended. (Rick Keigwin)

4. Louisiana Department of Agriculture and Forestry on February 13, 1995, for the use of norflurazon on Bermuda grass to control annual grassy weeds. This program has ended. (Libby Pemberton)

5. Texas Department of Agriculture on February 8, 1995, for the use of hydrogen cyanamide on blueberries to allow uniform bloom. This program has ended. (Rick Keigwin)

6. Texas Department of Agriculture on January 30, 1995, for the use of hydrogen cyanamide on peach trees to stimulate uniform bud-break. This program has ended. (Rick Keigwin)

EPA has denied a specific exemption request from the Louisiana Department of Agriculture and Forestry for the use of metolachlor on spinach to control annual weeds. This specific exemption was denied because an emergency situation does not exist. This situation is not about avoiding economic losses if metolachlor is not granted due to the cancellation of diethatyl-ethyl, but rather about future marketing opportunity of earning profits due to a new enterprise of growing processed spinach which was not generally grown in central Louisiana. This new acreage did not previously use diethatyl-ethyl; therefore, it could not be lost as a weed control tool in spinach production. Use of metolachlor would allow growers entry into a profitable market of a new crop rather than prevent losses from a crop already established for market. No significant economic loss would be attributed to this pest problem. (Margarita Collantes)
