

corresponds to approximately 52 megawatts-electrical (MWe). This would provide additional electrical power to the grids which service the commercial and residential areas of the distribution utility.

#### *Environmental Impacts of the Proposed Action*

A slight change in the environmental impact can be expected for an increase in plant power level, but the effects were found to be minimal and did not alter the findings stated in NUREG-0812, "Final Environmental Statement Related to Operation of Nuclear Project No. 2" (FES), December 1981.

The proposed core uprating is projected to increase the rejected heat by approximately 5 percent. However, the thermal discharges from the circulating and service water systems remain bounded by the values evaluated in the FES. Thus, the 5 percent increase in rejected heat has been evaluated and determined not to significantly impact on the quality of the human environment.

The licensing basis analyses related to radiological source terms were originally performed assuming a core power of 3486 MWt which corresponds to the proposed rerate conditions. The NRC review of these calculations was documented in NUREG-0892, "Safety Evaluation Report Related to the Operation of Nuclear Project No. 2." Additional assessments by the licensee related to the rerated conditions (power level and reactor coolant temperature) and other changes related to plant operation determined there would be no significant increase in the potential radioactive releases resulting from plant operation or design basis reactor accidents. In addition, no significant increases in individual or cumulative occupational radiation exposure would result from the proposed changes in operating conditions. Also, he proposed increase in the NSSS power involves no significant change in the amount of any non-radiological effluents that may be released offsite compared to those evaluated and approved in the FES.

Therefore, the Commission concludes that there is no significant radiological or non-radiological environmental impacts associated with the proposed amendment.

#### *Alternatives to the Proposed Action*

Since the Commission has concluded there is no measurable environmental impact associated with the proposed action, any alternatives with equal or greater environmental impact need not be evaluated. As an alternative to the proposed action, the staff considered

denial of the proposed action. Denial of the amendment would not significantly reduce the environmental impact of plant operation and would restrict operation of the Nuclear Project No. 2 to the currently licensed power level, thereby reducing operational flexibility.

#### *Alternative Use of Resources*

This action does not involve the use of any resources not previously considered in the Final Environmental Statement for the Nuclear Project No. 2.

#### *Agencies and Persons Consulted*

By letter of September 26, 1994, Mr. Jason J. Zeller of the Energy Facility Site Evaluation Council of the State of Washington informed the staff that the State official had no comments.

#### **Finding of No Significant Impact**

Based upon the environmental assessment, the Commission concludes that the proposed action will not have a significant effect on the quality of the human environment. Accordingly, the Commission has determined not to prepare an environmental impact statement for the proposed action.

For further details with respect to the proposed action, see the licensee's letter dated July 9, 1993, as supplemented by letters dated October 9, and October 25, 1993, January 6, January 6, February 2, May 3, May 13, September 26, and October 12, 1994, which are available for public inspection at the Commission's Public Document Room, The Gelman Building, 2120 L Street, NW., Washington, DC, and at the local public document room located at the Richland Public Library, 955 Northgate Street, Richland, Washington 99352.

Dated at Rockville, Maryland, this 28th day of April 1995.

For the Nuclear Regulatory Commission,

**William H. Bateman,**

*Director, Project Directorate IV-2, Division of Reactor Projects III/IV, Office of Nuclear Reactor Regulation.*

BILLING CODE 7590-01-M

#### **Advisory Committee on Nuclear Waste; Notice of Meeting**

The Advisory Committee on Nuclear Waste (ACNW) will hold its 74th meeting on May 10, 1995, in Room T-2B3 and May 11, 1995, in Room T-2B1, at 11545 Rockville Pike, Rockville, Maryland.

The entire meeting will be open to public attendance.

The agenda for this meeting shall be as follows:

*Wednesday, May 10, 1995—8:30 A.M. until 6:00 P.M. and Thursday, May 11, 1995—8:30 A.M. until 6:00 P.M.*

During this meeting the Committee plans to consider the following:

A. *NRC staff Position on Substantially Complete Containment*—The Committee will review the NRC staff position on the meaning of substantially complete containment as used in the Commission's regulations for the disposal of high-level radioactive wastes in geologic repositories.

B. *Electronic Data Transfer*—Representatives from the U.S. Department of Energy will discuss the electronic transfer of site characterization data from the DOE to the NRC and Center for Nuclear Waste Regulatory Analyses staffs.

C. *Meeting with the Director, NRC's Division of Waste Management, Nuclear Materials Safety and Safeguards*—The Director will provide information to the Committee on current waste management issues, which may include the progress of site characterization at the proposed Yucca Mountain site and a preview of the NRC staff's review strategy for DOE seismic hazard analysis.

D. *National Performance Review Phase 2*—The Committee will hear presentations by and hold discussions with the NRC staff on initiatives to streamline the Federal government and regulatory process.

E. *Preparation of ACNW Reports*—The Committee will discuss proposed reports on the Approach to Groundwater Travel Time at Yucca Mountain and comments on a low-level waste branch technical position on performance assessment. Additional topics will be considered as time permits.

F. *Committee Activities/Future Agenda*—The Committee will consider topics proposed for future consideration by the full Committee and Working Groups. The Committee will also discuss ACNW-related activities of individual members.

G. *Miscellaneous*—The Committee will discuss miscellaneous matters related to the conduct of Committee activities and organizational activities and complete discussion of matters and specific issues that were not completed during previous meetings, as time and availability of information permit.

Procedures for the conduct of and participation in ACNW meetings were published in the **Federal Register** on October 7, 1994 (59 FR 51219). In accordance with these procedures, oral or written statements may be presented by members of the public, electronic

recordings will be permitted only during those portions of the meeting that are open to the public, and questions may be asked only by members of the Committee, its consultants, and staff. Persons desiring to make oral statements should notify the ACNW Executive Director, Dr. John T. Larkins, as far in advance as practicable so that appropriate arrangements can be made to allow the necessary time during the meeting for such statements. Use of still, motion picture, and television cameras during this meeting may be limited to selected portions of the meeting as determined by the ACNW Chairman. Information regarding the time to be set aside for this purpose may be obtained by contacting the ACNW Executive Director prior to the meeting. In view of the possibility that the schedule for ACNW meetings may be adjusted by the Chairman as necessary to facilitate the conduct of the meeting, persons planning to attend should check with the ACNW Executive Director if such rescheduling would result in major inconvenience.

Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by contacting the ACNW Executive Director, Dr. John T. Larkins (telephone 301/415-7360), between 7:30 a.m. and 4:15 p.m. EDT.

Dated: April 26, 1995.

**Andrew L. Bates,**

*Advisory Committee Management Officer.*

BILLING CODE 7590-01-M

[Docket No. 50-293]

**Boston Edison Company; Pilgrim Nuclear Power Station; Receipt of Petition for Director's Decision Under 10 CFR 2.206**

Notice is hereby given that by letter dated March 10, 1995, Mary Elizabeth Lampert and 62 other persons request that the U.S. Nuclear Regulatory Commission (NRC) take action with regard to the Pilgrim Nuclear Power Station operated by the Boston Edison Company (the licensee).

Petitioners request that during the March 25, 1995, refueling outage and In-Vessel Visual Inspection conducted by the licensee, certain technical concerns be addressed, and that before Pilgrim goes back on-line, appropriate repairs be made or corrective action be taken, and that the NRC discuss the status of such repairs and corrective actions with the

public in Plymouth, Massachusetts. Petitioners also request that the NRC terminate its policy of issuing Notices of Enforcement Discretion (NOED) and commence enforcing NRC regulations again. Finally, Petitioners request that the letter be treated as a Petition pursuant to 10 CFR 2.206.

As the bases for their requests, Petitioners identify three groups of technical concerns: (1) Age-related deterioration of 25 safety related reactor internals; (2) parts and components "known to be a problem at Pilgrim," including the core shroud, water level indicators, QA for fuel pool cooling system during loss-of-coolant accident/loss-of-coolant protection, coolant protection, motor-operated valves, containment integrity, drywell liner corrosion vulnerability, station blackout vulnerability, and Rosemount transmitters; and (3) parts and components "potentially a problem at Pilgrim," including potential fuel rod corrosion and substandard and/or counterfeit parts. Additionally, Petitioners contend that allowing a reactor to operate under an NOED cannot pose less risk to the public health and safety than keeping the reactor shut down until NRC regulations are met.

The Petition is being evaluated pursuant to 10 CFR 2.206 of the Commission's regulations. The Petition has been referred to the Director of the Office of Nuclear Reactor Regulation. As provided by Section 2.206, appropriate action will be taken on this Petition within a reasonable time.

A copy of the Petition is available for inspection at the Commission's Public Document Room at 2120 L Street, NW., Washington, DC 20001.

Dated at Rockville, Maryland, this 19th day of April 1995.

For the Nuclear Regulatory Commission.

**William T. Russell,**

*Director, Office of Nuclear Reactor Regulation.*

BILLING CODE 7590-01-M

**Appointments to Performance Review Boards for Senior Executive Service**

**AGENCY:** U.S. Nuclear Regulatory Commission.

**ACTION:** Appointment to Performance Review Boards for Senior Executive Service.

**SUMMARY:** The U.S. Nuclear Regulatory Commission (NRC) has announced the following appointments to the NRC Performance Review Boards.

The following individuals are appointed as members of the NRC Performance Review Board (PRB) responsible for making recommendations to the appointing and awarding authorities on performance appraisal ratings and performance awards for Senior Executives:

*New Appointees:*

Lawrence J. Chandler, Assistant General Counsel, Office of the General Counsel

Richard L. Bangart, Director, Office of State Programs

Leonard J. Callan, Regional Administrator, Region IV

Ronald M. Scroggins, Deputy Chief Financial Officer/Controller, Office of the Controller

Ashok Thadani, Associate Director for Technical Assessment, Office of Nuclear Reactor Regulation

In addition to the above new appointments, the following members are continuing on the PRB:

Stephen G. Burns, Associate General Counsel, Office of the General Counsel

John C. Hoyle, Secretary of the

Commission, Office of the Secretary  
James L. Blaha, Assistant for Operations, Office of the Executive Director for Operations

Frank J. Miraglia, Deputy Director, Office of Nuclear Reactor Regulation

Bill M. Morris, Director, Division of Regulatory Applications, Office of Nuclear Regulatory Research

Elizabeth Q. Ten Eyck, Deputy Director, Division of Fuel Cycle Safety and Safeguards, Office of Nuclear Material Safety and Safeguards

The following individuals will continue as members of the NRC PRB Panel that was established to review appraisals and make recommendations to the appointing and awarding authorities for NRC PRB members:

Hugh L. Thompson, Jr., Deputy Executive Director for Nuclear Materials Safety, Safeguards and Operations Support, Office of the Executive Director for Operations

Karen D. Cyr, General Counsel, Office of the General Counsel

James L. Milhoan, Deputy Executive Director for Nuclear Reactor Operations, Regulatory Operations, and Research, Office of the Executive Director for Operations

All appointments are made pursuant to Section 4314 of Chapter 43 of Title 5 of the United States Code.

**EFFECTIVE DATE:** May 2, 1995.

**FOR FURTHER INFORMATION CONTACT:** James F. McDermott, Secretary, Executive Resources Board, U.S.
