

his drug use, but had not shown rehabilitation from the falsification. Accordingly, the Hearing Officer determined that the individual's clearance should not be restored.

Refund Application

Gulf Oil Corporation/Hilltop Auto Laundry, 3/23/95, RF300-15647

Hilltop Auto Laundry filed an Application for Refund in the Gulf Oil Corporation (Gulf) special refund proceeding. Hilltop requested an above-

volumetric refund based on Gulf's alleged breach of 1972 franchise and supply agreements. The conduct cited by Hilltop was Gulf's termination of the franchise arrangement, Gulf's use of a substitute supplier, and Hilltop's receipt of less product than provided for under the 1972 contract. In considering Hilltop's Application, the DOE noted that refunds are granted based on alleged or actual regulatory violations, not alleged breaches of contractual agreements. The DOE determined that

Hilltop had not demonstrated that the conduct in question violated the regulations. Accordingly, the Application was denied.

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

Name	Case No.	Date
Skilo Mfg. Inc.	RC272-285	03/22/95
Texaco Inc./Dave & Jack's Texaco Service, Inc.	RF321-20885	03/22/95
Millcrest Texaco	RF321-20914.	
White's Texaco	RF321-20931.

Issuance of Decisions and Orders During the Week of February 13 through February 17, 1995

During the week of February 13 through February 17, 1995, the decisions and orders summarized below were issued with respect to appeals and applications for other relief filed with the Office of Hearings and Appeals of the Department of Energy. The following summary also contains a list of submissions that were dismissed by the Office of Hearings and Appeals.

Appeal

Southwest Resource Development, 2/15/95, VFA-0020

Southwest Resource Development (Southwest) filed an Appeal from a partial denial by the DOE's Office of Inspector General (IG) of a Request for Information which Southwest had submitted under the Freedom of Information Act (FOIA). In considering the Appeal, the DOE found that IG properly applied Exemptions 6 and 7(C) to the information requested by Southwest. The DOE found that the information requested by Southwest might identify individuals in an IG investigation by indicating certain functions performed by them. Since the interest in the identity of the individuals did not outweigh the individuals' privacy interest, the release of identifying information would constitute an unwarranted invasion of privacy. Accordingly, the Appeal was denied.

Refund Applications

Defense Logistics Agency, 2/14/95, RF272-11

The DOE issued a Decision and Order concerning an Application for Refund filed in the Subpart V Crude Oil refund proceeding by Defense Logistics Agency (DLA), a purchasing organ for the federal government. In granting the DLA refund claim, the DOE rejected challenges to the agency's right to receive a refund in the proceeding and DLA's claimed status as a product end-user. The DOE noted that agencies of the federal government are not precluded from participation in the Crude Oil refund proceeding, and that DLA was properly classified as an end-user since its purchase of refined petroleum product ended the commercial marketing of the product which was consumed by entities of the federal government. DLA was therefore granted a refund of \$34,161,149.

Holston Defense Corp., 2/13/95, RF272-91995

The DOE issued a Decision and Order denying Holston Defense Corporation's application for refund in the crude oil special refund proceeding. The applicant purchased petroleum products for work done under contract with the U.S. Department of Defense. Since the Department of Defense reimbursed Holston for all petroleum purchases, it was ineligible to receive a refund in this proceeding. Therefore, the Application for Refund was denied.

Refund Applications

The Office of Hearings and Appeals issued the following Decisions and

Orders concerning refund applications, which are not summarized. Copies of the full texts of the Decisions and

Orders are available in the Public Reference Room of the Office of Hearings and Appeals.

ENVIRONMENTAL PROTECTION AGENCY

[FRL-5201-1]

Office of Research and Development; Ambient Air Monitoring Reference and Equivalent Methods; Equivalent Method Designations

Notice is hereby given that EPA, in accordance with 40 CFR part 53, has designated 3 additional equivalent methods, for the measurement of ambient concentrations of sulfur dioxide, nitrogen dioxide, and ozone. The new equivalent methods are automated methods (analyzers) that utilize a measurement principle based on differential optical absorption spectroscopy (DOAS) and measure pollutant concentrations in the ambient air over a long, open path up to 1 kilometer in length. The new designated methods are identified as follows:

EQSA-0495-101, Opsis Model AR 500 System, open path (long path) ambient air monitoring system configured for measuring SO₂, with one detector and movable grating, operated with a measurement range of 0 to 0.5 ppm, an installed monitoring path length between 20 and 500 meters (or 20 and 1000 meters with the ER 150 option), xenon lamp type B (150 watt), fiber optic cable length between 3 to 20 meters; operating within an ambient air temperature range of -50 to +50°C, an analyzer temperature range of 20 to 30°C, a measurement (integrating) time setting between 30 and 120 seconds (0 min:30 sec. to 2 min:00 sec.), and with a complete cycle time of not more than 200 seconds (3 min, 20 sec.). Under this method designation, the Model AR 500 System consists of:

AR 500 opto-analyser,
Emitter EM 110 and receiver RE 110 (together identified as ER 110),
Optic fibre cable OF 60-S,
Power supply PS 150,
OP SIS operational software, version 7.0,
Initial on-site installation, setup, and limited operator training.

Optional components that can be used in addition to or as alternative to corresponding components listed above are:

AR 503 opto-analyzer configured as Model AR 500 (only the center detector active, sequential monitoring),
Emitter/receiver ER 150 (for monitoring path lengths up to 1 kilometer),
Xenon lamp type A (higher short-wavelength UV output),
Optic fibre cable OF 60-R (low-loss for short wavelengths),
Multiplexers MX 004 and MX 024,
Dataloggers DL 010 and DL 016,
Analogue and digital input/output cards AO 008, AI 016, and DI 032,
Analogue and digital isolation cards IA 008, ID 008, AO 008, and OD 008,
Window heaters HF 110 and HF 150,
Mirror heaters HM 110 and HM 150,
Auto calibration unit CU 007,
Software packages IO 80 version 1.4 (for the analogue and digital input/output adapters), DL10 and DL16 (for data loggers), ComVision, and STAT 500;
and recommended calibration and accuracy audit components (or equivalent):
Wavelength calibration lamp CA 004,
Calibration bench CB 100,
Receiver unit RE 060 (two required),
Calibration unit CA 150, with same type lamp as used in the monitoring path emitter,
