International Trade Administration

[A-588-703]

Certain Internal-Combustion Industrial Forklift Trucks From Japan; Amendment to Final Results of Antidumping Duty Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of amendment to final results of antidumping duty administrative review.

SUMMARY: On January 28, 1992, the Department of Commerce (the

Department) published in the **Federal Register** the final results of its 1987-89 administrative review of the antidumping duty order on certain internal-combustion industrial forklift trucks from Japan. The review covered four manufacturers/exporters of this merchandise to the United States during the period November 24, 1987, through May 31, 1989. Based on the correction of a ministerial error, we are amending the final results with respect to Mitsubishi Heavy Industries, Limited (Mitsubishi).

EFFECTIVE DATE: May 2, 1995.

FOR FURTHER INFORMATION CONTACT: Davina Friedmann or Michael Rill, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington, D.C. 20230, telephone: (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

On January 28, 1992, the Department published in the **Federal Register** the final results of its 1987-89 administrative review of the antidumping duty order (June 7, 1988, 53 FR 20882) on certain internal-combustion industrial forklift trucks from Japan (57 FR 3167). The review covered four manufacturers/exporters of this merchandise to the United States during the period November 24, 1987 through May 31, 1989.

It has come to our attention that, in those final results, the Department inadvertently made a typographical error in publishing the margin, based on the best information available (BIA), as 39.15 percent for Mitsubishi. As stated in those final results, the Department intended to assign the "All Others" rate from the investigation. That "All Others" rate was 39.45 percent. The Department is now correcting Mitsubishi's margin to 39.45 percent from the incorrect figure of 39.15 percent.

The Court of International Trade in *Mitsubishi Heavy Industries v. United States*, Slip Op. 93-182 (September 15, 1993), affirmed the Department's application of the "All Others" rate from the investigation as BIA for Mitsubishi.

Amended Final Results of Review

As a result of our correction of a ministerial error, we have determined the following percentage weighted-average margin to exist for the period November 24, 1987 through May 31, 1989:

Manufacturer/Exporter	Margin percent
Mitsubishi	39.45

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between United States price and foreign market value may vary from the percentage stated above. The Department will issue appraisal instructions on each exporter directly to the Customs Service.

Furthermore, a cash deposit of 39.45 percent will be required for all shipments by Mitsubishi of the subject merchandise entered, or withdrawn from warehouse, for consumption on or after the date of publication of these amended final results of administrative review, as provided by section 751(a)(1) of the Tariff Act of 1930.

This deposit requirement shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This notice is published in accordance with section 751(f) of the Tariff Act of 1930, as amended (19 U.S.C. 1675(f) and 19 CFR 353.28(c).

Dated: April 19, 1995.

Susan G. Esserman,

Assistant Secretary for Import Administration.

[FR Doc. 95-10781 Filed 5-1-95; 8:45 am]

BILLING CODE 3510-DS-P

A-427-030

Large Power Transformers From France; Preliminary Results of Antidumping Administrative Review

AGENCY: Import Administration, International Trade Administration, Department of Commerce.

ACTION: Notice of preliminary results of the antidumping duty administrative review; large power transformers from France.

SUMMARY: The Department of Commerce (the Department) is conducting an administrative review of the antidumping duty finding on large

power transformers (LPTs) from France in response to a request by respondent, Jeumont Schneider Transformateurs (JST). This review covers shipments of this merchandise to the United States during the period June 1, 1993 through May 31, 1994.

We have preliminarily determined that sales have been made below the foreign market value (FMV). If these preliminary results are adopted in our final results, we will instruct U.S. Customs to assess antidumping duties equal to the differences between the United States price (USP) and FMV. We have preliminarily found a dumping margin of 1.50 percent for JST.

Interested parties are invited to comment on these preliminary results.

EFFECTIVE DATE: May 2, 1995.

FOR FURTHER INFORMATION CONTACT:

Donald Little, Elisabeth Urfer, or Maureen Flannery, Office of Antidumping Compliance, Import Administration, International Trade Administration, U.S. Department of Commerce, 14th Street and Constitution Avenue, N.W., Washington D.C. 20230; telephone (202) 482-4733.

SUPPLEMENTARY INFORMATION:

Background

The Treasury Department published in the **Federal Register** an antidumping finding on LPTs from France on June 14, 1972 (37 FR 11772). On June 7, 1994, we published in the **Federal Register** (59 FR 29411) a notice of opportunity to request an administrative review of the antidumping finding on LPTs from France covering the period June 1, 1993 through May 31, 1994.

In accordance with 19 CFR 353.22(a), JST requested that we conduct an administrative review of its sales. We published a notice of initiation of this antidumping duty administrative review on July 15, 1994 (59 FR 36160). The Department is conducting this administrative review in accordance with section 751 of the Tariff Act of 1930, as amended (the Act).

Scope of Review

Imports covered by the review are shipments of LPTs; that is, all types of transformers rated 10,000 kVA (kilovolt-amperes) or above, by whatever name designated, used in the generation, transmission, distribution, and utilization of electric power. The term "transformers" includes, but is not limited to, shunt reactors, autotransformers, rectifier transformers, and power rectifier transformers. Not included are combination units, commonly known as rectifiers, if the entire integrated assembly is imported

in the same shipment and entered on the same entry and the assembly has been ordered and invoiced as a unit, without a separate price for the transformer portion of the assembly. This merchandise is currently classifiable under the Harmonized Tariff Schedule (HTS) item numbers 8504.22.00, 8504.23.00, 8504.34.33, 8504.40.00, and 8504.50.00. The HTS item numbers are provided for convenience and Customs purposes. The written description remains dispositive.

This review covers one manufacturer/exporter of transformers, JST, and the period June 1, 1993 through May 31, 1994.

Verification

We conducted verification of JST's questionnaire response in Lyons, France, from March 6 through March 10, 1995.

United States Price

For sales made by JST we based the USP on purchase price, in accordance with section 772(b) of the Act, because the subject merchandise was sold to unrelated purchasers in the United States prior to importation into the United States.

JST requested that we include in this review two purchase price sales that entered during the period of review (POR), and one purchase price sale which was sold during the POR, but which entered the United States after the POR. Due to the timing of this third shipment, we were unable to verify certain relevant data pertaining to this sale (see the proprietary memorandum to the file dated April 5, 1995). Therefore, we did not include this sale in our analysis for these preliminary results.

We calculated purchase price based on the delivered price to unrelated purchasers. We made deductions for ocean freight, foreign inland freight, U.S. inland freight, U.S. duty, ocean freight, and, where applicable, air freight.

Foreign Market Value

We preliminarily determine that there are no home market or third country sales of comparable merchandise. Therefore, in accordance with section 773(a)(2) of the Act, we used constructed value (CV) to calculate FMV for JST.

CV consists of the cost of materials, labor, fabrication, general expenses, profit, and packing. We used: (1) Actual general expenses or the statutory minimum of 10 percent of materials and fabrication, whichever was greater; (2)

actual profit or the statutory minimum of 8 percent of materials and fabrication costs and general expenses, whichever was greater; and (3) packing costs for merchandise exported to the United States. We made a circumstance-of-sale adjustment by deducting from CV home market direct selling expenses, *i.e.*, warranties and commissions, and adding to CV U.S. direct selling expenses, *i.e.*, commissions, selling expenses, and credit. No other adjustments were claimed or allowed.

Preliminary Results of the Review

We preliminarily determine that the following dumping margin exists:

Manufacturer/Exporter	Time period	Margin (percent)
Jeumont Schneider Transformateurs.	6/1/93-5/31/94	1.50

Parties to the proceeding may request disclosure within 5 days of the date of publication of this notice. Any interested party may request a hearing within 10 days of publication. Any hearing, if requested, will be held 44 days after the publication of this notice, or the first workday thereafter. Interested parties may submit case briefs within 30 days of the date of publication of this notice. Rebuttal briefs, which must be limited to issues raised in the case briefs, may be filed not later than 37 days after the date of publication. The Department will publish a notice of final results of this administrative review, which will include the results of its analysis of issues raised in any such comments.

The Department shall determine, and the Customs Service shall assess, antidumping duties on all appropriate entries. Individual differences between USP and FMV may vary from the percentage stated above. Upon completion of this review, the Department will issue appraisal instructions directly to the Customs Service.

Furthermore, the following deposit rates will be effective upon publication of the final results of these administrative reviews for all shipments of LPTs from France entered, or withdrawn from warehouse, for consumption on or after the publication date, as provided for by section 751(a)(1) of the Act: (1) The cash deposit rate for the reviewed company will be the rate established in the final results of this review; (2) for previously reviewed or investigated companies not listed above, the cash deposit rate will continue to be the company-specific rate

published for the most recent period; (3) if the exporter is not a firm covered in this review, a prior review or the original less-than-fair-value investigation, but the manufacturer is, the cash deposit rate will be the rate established for the most recent period for the manufacturer of the merchandise; and (4) for all other producers and/or exporters of this merchandise, the cash deposit rate shall be 24 percent, the rate established in the first notice of final results of administrative review published by the Department (47 FR 10268, March 10, 1982).

These deposit rates, when imposed, shall remain in effect until publication of the final results of the next administrative review.

This notice also serves as a preliminary reminder to importers of their responsibility under 19 CFR 353.26 to file a certificate regarding the reimbursement of antidumping duties prior to liquidation of the relevant entries during this review period. Failure to comply with this requirement could result in the Secretary's presumption that reimbursement of antidumping duties occurred and the subsequent assessment of double antidumping duties.

This administrative review and notice are in accordance with section 751(a)(1) of the Act (19 U.S.C. 1675(a)(1)) and 19 CFR 353.22.

Dated: April 25, 1995.

Paul L. Joffe,

Deputy Assistant Secretary for Import Administration.

BILLING CODE 3510-DS-P

National Oceanic and Atmospheric Administration

[I.D. 042595C]

Endangered Species; Permits

AGENCY: National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

ACTION: Issuance of modification 2 to permit 900 (P770#66), modification 1 to permit 914 (P770#67), and modification 5 to permit 795 (P503A).

SUMMARY: Notice is hereby given that NMFS has issued modifications to permits authorizing takes of listed species for the purpose of scientific research, subject to certain conditions set forth therein, to the Northwest Fisheries Science Center, NMFS (NWFSC) and the Idaho Department of Fish and Game (IDFG).

ADDRESSES: The applications and related documents are available for review in the following offices, by appointment:

Office of Protected Resources, F/PR8, NMFS, 1315 East-West Highway, Silver Spring, MD 20910-3226 (301-713-1401); and

Environmental and Technical Services Division, F/NW03, NMFS, 525 NE Oregon Street, Portland, OR 97232-4169 (503-230-5400).

SUPPLEMENTARY INFORMATION: Notice was published on January 19, 1995 (60 FR 3844) that an application had been filed by NWFSC (P770#66) for modification 2 to permit 900 to take listed species as authorized by section 10 of the Endangered Species Act of 1973 (ESA) (16 U.S.C. 1531-1543) and the NMFS regulations governing listed fish and wildlife permits (50 CFR parts 217-222).

NWFSC requested an increase in the take of juvenile, listed, Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) associated with Study 3, a preliminary evaluation of the new juvenile collection, bypass, and sampling facility at McNary Dam. The increased take was requested to test an automatic system for detecting and diverting run-of-the-river fish tagged with passive integrated transponders (PIT) from the population of fish moving through the collection facility. The purpose of the automatic PIT tag detector and diversion system is to facilitate the collection of scientific information on juvenile salmonid migration while minimizing adverse impacts to the fish. Modification 2 to permit 900 was issued on April 7, 1995. The increased take is valid for 1995 only. Permit 900 expires on December 31, 1998.

Notice was published on February 9, 1995 (60 FR 7752) that an application had been filed by NWFSC (P770#67) for modification 1 to permit 914 to take listed species as authorized by the above laws and regulations.

NWFSC requested an increase in the take of juvenile, listed, naturally-produced and artificially-propagated Snake River spring/summer chinook salmon (*Oncorhynchus tshawytscha*) and juvenile, endangered, Snake River fall chinook salmon (*Oncorhynchus tshawytscha*) to assess the incidence of gas bubble disease (GBD) in selected aquatic biota of the Columbia River Basin during episodes of high spill volumes at Ice Harbor Dam on the Snake River and Bonneville Dam on the Columbia River in the Pacific Northwest. NWFSC also requested authorization to take juvenile,

endangered, Snake River sockeye salmon (*Oncorhynchus nerka*) for a new study to compare the prevalence of signs of GBD in juvenile salmonids collected from the reservoir and tailrace of Ice Harbor Dam on the Snake River and the reservoir of McNary Dam on the Columbia River with the prevalence of signs of GBD in fish examined by Fish Passage Center Smolt Monitoring Program personnel at the same two dams. Modification 1 to permit 914 was issued on April 14, 1995. The increased take is valid for 1995 only. Permit 914 expires on December 31, 1998.

Notice was published on January 19, 1995 (60 FR 3844) that an application had been filed by IDFG (P503A) for modification 5 to permit 795 to take listed species as authorized by the above laws and regulations.

Permit 795 authorizes a take of listed species associated with scientific research and enhancement activities, including a captive broodstock program, on endangered Snake River sockeye salmon (*Oncorhynchus nerka*). For modification 5, IDFG requested authorization to: (1) Release second generation progeny of anadromous sockeye salmon that returned to Redfish Lake in 1991, (2) release progeny of 1991 outmigrant sockeye females spawned in 1993 with anadromous sockeye males, (3) release broodyear 1993 progeny of anadromous sockeye females that returned to Redfish Lake in 1993, and (4) increase the annual number of outmigrant sockeye juveniles to be trapped and handled at the Redfish Lake Creek weir. Modification 5 to permit 795 was issued on April 19, 1995. Activities 1-3 are valid for 1995 only. Activity 4 is valid for the duration of the permit. Permit 795 expires on July 31, 1997.

Issuance of these modifications, as required by the ESA, was based on a finding that such modifications: (1) Were applied for in good faith, (2) will not operate to the disadvantage of the listed species that are the subject of the permits, and (3) are consistent with the purposes and policies set forth in section 2 of the ESA and the NMFS regulations governing listed species permits.

Dated: April 26, 1995.

Russell J. Bellmer,

Chief, Endangered Species Division, National Marine Fisheries Service.
