BILLING CODE 4210-01-M

DEPARTMENT OF THE INTERIOR

Fish and Wildlife Service

Endangered and Threatened Wildlife and Plants; Notice of Availability of Draft Economic Analysis for the Designation of Critical Habitat in States of Washington, Oregon, and California for the Western Snowy Plover

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Notice of availability.

SUMMARY: The U.S. Fish and Wildlife Service (Service) announces that the draft economic analysis for the

proposed designation of critical habitat for the western snowy plover is available for public review. This draft document examines the economic effect of designating 28 areas in the states of Washington, Oregon and California.

DATES: Comments received by May 31, 1995, will be considered in the preparation of the final document.

ADDRESSES: Persons wanting to review the draft economic analysis may obtain a copy from Joel Medlin, Field Supervisor, U.S. Fish and Wildlife Service, Sacramento Field Office, 2800 Cottage Way, Room E-1803, Sacramento, CA 95825-1846. Written comments and materials concerning the draft economic analysis for the designation of critical habitat for the western snowy plover should be sent to Joel Medlin, Field Supervisor, at the address above. Written comments and materials received will be available for public inspection, by appointment, during normal business hours at the above address.

FOR FURTHER INFORMATION CONTACT: Ms. Karen J. Miller, Sacramento Field Office (see ADDRESSES section, telephone (916) 979-275, facsimile (916) 979-2723.

SUPPLEMENTARY INFORMATION: The Service listed the coastal population of the western snowy plover (*Charadrius alexandrinus nivosus*) as a threatened species on March 5, 1993 (58 FR 12864). The Service proposed critical habitat for the species on March 2, 1995 (60 FR 11768). The designated areas cover approximately 20,000 acres along 210 miles of coastline in the three states: 19 areas in California, 7 in Oregon, and 2 in Washington. The areas are largely in Federal ownership, but significant areas are state and privately owned land, particularly in California. The draft economic analysis estimates how the designation may affect Federal lands, as well as non-Federal activities authorized or funded by Federal agencies. Activities on private or state-owned lands that do not involve Federal permits, funding or other Federal actions would not be restricted by a designation of critical habitat. Economic effects caused by the listing of the plover as threatened and effects of other related statutes form the baseline from which critical habitat effects are measured. The draft analysis isolates the incremental economic and conservation effects of the critical habitat designation. Economic effects are measured by evaluating factors such as changes in national income, regional jobs, and household income.
