ENVIRONMENTAL PROTECTION AGENCY

[FRL-S204-4]

Agency Information Collection Activities Under OMB Review

AGENCY: Environmental Protection Agency.

ACTION: Notice.

SUMMARY: In compliance with the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*), this notice announces that the Information Collection Request (ICR) abstracted below has been forwarded to the Office of Management and Budget (OMB) for review and comment. The ICR describes the nature of the information collection and its expected cost and burden; where appropriate, it includes the actual data collection instrument.

DATES: Comments must be submitted on or before June 8, 1995.

FOR FURTHER INFORMATION CONTACT: Sandy Farmer at EPA, (202) 260-2740, please refer to EPA ICR #1602.02

Office of Air and Radiation

Title: Maximum Achievable Control Technology (MACT) Standards Development Under Title III (Section 112) of the Clean Air Act Regulatory Development Program (EPA ICR #1602.02). This is a renewal of an already existing information collection.

Abstract: Respondents are owners or operators of facilities included on the list of source categories for which EPA plans to initiate development of national emission standards for hazardous air pollutants (NESHAP) under Section 112(d) of the amended Clean Air Act within the next 3 years, as well as a limited number of source categories for which NESHAP development studies are currently underway. Depending on the number of facilities in an individual source category, respondents would be required to complete one of two surveys. In those source categories with 400 or fewer facilities, respondents would complete a survey for maximum achievable control technology (MACT) standards development. This survey is designed to obtain facility-specific information on process types, emissions, controls, and factors affecting costs to ensure that the EPA Office of Air Quality Planning and Standards (OAQPS) has sufficient information to make subcategory distinction and MACT floor decisions for each NESHAP. In those source categories with more than 400 facilities,

respondents would complete a screening survey. EPA would use the results of the screening survey to develop a sample design that would be applied to individual ICR's for the MACT standards development survey.

"Burden Statement: The public reporting burden for this collection of information is estimated to average 8.5 hours per response for completing the screening survey and 85 hours for completing the MACT standards development survey. This estimate includes the time needed to review instructions, search existing data sources, gather the data needed and review the collection of information. Reporters would complete and submit the surveys once. EPA would choose a new set of 6,903 respondents each year.

Respondents: Owners or operators of facilities which emit hazardous air pollutants.

Estimated Annual No. of Respondents: 2,190 MACT Survey Respondents; 4,713 Screening Survey Respondents.

Estimated No of Responses per Respondent: 1.

Estimated Total Annual Burden: 226,210 hours.

Frequency of Collection: One time.

Send comments regarding the burden estimate, or any other aspect of this information collection, including suggestions for reducing burden, (please refer to EPA ICR #1602.02 and OMB #2060-0239) to:
