

SUPPLEMENTARY INFORMATION: The second meeting of the Marine Advisory Committee on Occupational Safety and Health will be held June 1, 1995, from 9:00 to 5:00, and June 2, from 9:00 to 1:00 at the BWI Airport Marriott, 1743 West Nursery Road, Baltimore, MD. At this second meeting, the Committee will discuss maritime standard development issues and training and outreach initiatives.

All interested persons are invited to attend the public meetings of MACOSH, including this second one at the time and place indicated above. Seating will be available to the public on a first-come first-served basis. Individuals with disabilities wishing to attend should contact Theda Kenney at 202-219-8061, no later than May 19, 1995, to obtain appropriate accommodations.

MACOSH will meet as a whole and also in small focus groups. Written data, views or comments for consideration by the Committee may be submitted, preferably with 20 copies, to Larry Liberatore at the address provided above. Any such submissions received prior to the meeting will be provided to the members of the Committee and will be included in the record of the meeting. Members of the general public may request an opportunity to make oral presentations at the meeting. Oral presentations will be limited to statements of fact and views, and shall not include any questioning of the committee members or other participants unless these questions have been specifically approved by the chairperson. Anyone wishing to make an oral presentation should notify Larry Liberatore before the meeting. The request should state the amount of time desired, the capacity in which the person will appear and a brief outline of the content of the presentation. Persons who request the opportunity to address the Advisory Committee may be allowed to speak, as time permits, at the discretion of the Chair of the Advisory Committee.

Signed at Washington, D.C. this 4th day of May 1995.

Joseph A. Dear,

Asistant Secretary of Labor.

BILLING CODE 4510-26-M

LIBRARY OF CONGRESS

Copyright Office

[Docket No. RM 94-4A]

Cable Compulsory License: Specialty Station List

AGENCY: Copyright Office, Library of Congress.

ACTION: Notice of filings, request for comments.

SUMMARY: The Copyright Office is publishing a list of stations that sent us affidavits claiming that they legally qualify for specialty station status. Specialty station status means a commercial broadcast television station qualifies as a specialty station under former distant signal carriage rules of the Federal Communications Commission (FCC) for purposes of administering section 111 of title 17, United States Code. Any party objecting to a listed station's claim should send the objection and the reasons for it to the Copyright Office.

DATES: Comments must be received by June 8, 1995. The effective date of the annotated list will coincide with the beginning of the accounting period that starts after the final list is published in the **Federal Register**.

ADDRESSES: By Mail: Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, DC 20024. By Hand: Office of the General Counsel, U.S. Copyright Office, James Madison Memorial Building, Room LM 407.

FOR FURTHER INFORMATION CONTACT: Marilyn J. Kretsinger, Acting General Counsel, Copyright GC/I&R, P.O. Box 70400, Southwest Station, Washington, D.C. 20024. Telephone: (202) 707-8380. Telefax: (202) 707-8366.

SUPPLEMENTARY INFORMATION: The Copyright Office is compiling a new specialty station list of television broadcast stations that qualify as specialty stations under the former distant signal carriage rules of the Federal Communications Commission (47 CFR 76.5(kk)(1981)). We published a Notice of Inquiry asking qualifying stations to submit sworn affidavits to the Office stating that the programming of their stations satisfies the FCC's former requirements for specialty station status¹ by March 27, 1995. 60 FR 4639 (January 24, 1995). The number of filings received indicated that many

¹ The FCC defined a specialty station as "a commercial television broadcast station that generally carries foreign-language, religious, and/or automated programming in one-third of the hours of an average broadcast week and one-third of weekly prime-time hours." 47 CFR 76.5(kk)(1976).

stations had not seen the **Federal Register** notice. To assure the new list is complete, we extended the deadline to April 24, 1995. 60 FR 18426 (April 11, 1995).

Background

The FCC did not consider the specialty station status of distant signals carried by cable systems after it deleted its distant signal carriage rules.² However, specialty station status is still relevant for administration of section 111 of the Copyright Act of 1976, because specialty stations may be carried as distant signals by cable television systems at a significantly lower rate than the 3.75% rate that is usually incurred by a system when it carries non-permitted signals.

The Office created its first specialty station list in 1990, and stated that it would compile a new list at approximately three year intervals. Ninety stations filed affidavits this year claiming specialty station status. These stations are listed below. We ask that any party who objects to another party's claim to specialty station status submit specific and factual comments as to which station(s) they object to, and why. The Office will publish a final annotated list of specialty stations that includes references to objections to stations' claims. Cable systems considering carriage of stations as specialty stations may then verify the station's status and program carriage before making a final decision.

Copyright Office licensing examiners will refer to the final annotated specialty station list in examining cable systems' claims on their Statements of Account that particular stations are specialty stations. If a cable system claims specialty station status for a station not on the final annotated list, the examiner will check to see if the station has filed an affidavit since publication of the list. Although the Office does not officially place stations filing affidavits after publication of the final list on this list, it will accept these affidavits for the record.

BILLING CODE 1410-31-P

NUCLEAR REGULATORY COMMISSION

Call for Nominations for Nuclear Safety Research Review Committee

AGENCY: Nuclear Regulatory Commission.

ACTION: Call for nominations.

SUMMARY: The U.S. Nuclear Regulatory Commission (NRC) is inviting nominations of qualified candidates to consider for appointment to fill three anticipated vacancies on its Nuclear Safety Research Review Committee (NSRRC). Nominations will be accepted till June 16, 1995.

ADDRESSES: Submit nominations to: Ms. Jude Himmelberg, Office of Personnel, U.S. Nuclear Regulatory Commission, Washington DC 20555.

FOR FURTHER INFORMATION CONTACT: Mr. George Sege, Designated Federal Officer for the NSRRC, U.S. Nuclear Regulatory Commission, Washington, DC 20555; telephone: 301-415-6593.

SUPPLEMENTARY INFORMATION: The Committee advises the Director of the NRC's Office of Nuclear Research—and through him the Commission—on the quality and conduct of NRC research activities and makes recommendations concerning the overall management and direction of the nuclear safety research program.

The 12-member Committee is composed of senior experts in nuclear

engineering or science capable of providing technical advice on the broad range of topics that are the subject of nuclear safety research for nuclear power plants and other facilities. Maintaining balance and diversity of experience, knowledge, and judgment is an important consideration in the selection of members. Committee members serve a two-year term and may be reappointed for up to two additional two-year terms.

Over the next two years, the Committee will be examining such issues as the quality of nuclear safety research relative to the needs of the users of the research products, the long-range direction of the nuclear safety research programs, the peer review process of research products and the capability of individuals and facilities where nuclear safety research is conducted.

In order to maintain a good balance of capabilities on the Committee, candidates should have expertise in nuclear engineering and nuclear safety, with emphasis on demonstrated capabilities in major portions of one of the following two areas.

- Advanced instrumentation and controls and human factors, including human-system interfaces.
- Broad experience in design and operation of nuclear power plants, nuclear engineering, and research related to nuclear power plants.

Selection for membership will be based on demonstrated capability and professional accomplishment in the indicated area of specialization, in the conduct or management of scientific or engineering research and in applying research to nuclear safety issues.

Nominations for membership must include a résumé describing the educational and professional qualifications of the nominee and the nominee's current address and daytime telephone number. Nominees must be U.S. citizens and be able to devote about 80 hours per year to Committee business.

Dated at Rockville, MD, this 2nd day of May 1995.

For the Nuclear Regulatory Commission.

Andrew L. Bates,

Advisory Committee Management Officer.
