Title: Electromagnetic Pulse Protection Inspection and Maintenance Procedures.

Abstract: FEMA manages an Electromagnetic Protection Pulse program which provides for the protection of communications facilities against electromagnetic pulse resulting from high altitude nuclear detonation or from environmental disturbances such as lightning and power line transients. Inspections of electrical and electronic devices and other material are performed at periodic intervals as established in the facility's EMP

Inspection and Maintenance Plan. Formal inspections are mandatory and are performed on an annual basis, informal inspections occur in conjunction with a significant event, such as recurring systems upsets, electrical storms, etc., and occasional inspections are performed periodically to locate degradation or other problems that occur between other types of inspections. The checklist is used to document and report on these inspection activities. If the checklist shows that EMP protection devices and materials are defective or inoperative and need to be removed, the Regional EMP Program Managers will use the information to replace those devices and materials.

Type of Respondents: Business or other for-profit; Federal Government; and State, Local or Tribal Government.

Estimate of Total Annual Reporting and Recordkeeping Burden: 2,472 hours.

Number of Respondents: 375.

Estimated Average Burden Time per Response: 6.6 hours.

Frequency of Response: Annually, on occasion.

Dated: May 1, 1995.
